EST. 2012

2022 | 1ST FINALIST

BRYAN SALMON

NQ LOCKSMITHS (QLD)

Please provide a short personal biography about yourself

Originally from Tasmania my family moved to North Queensland when I was five years old. I attended school in Townsville and when I was in Year 10 an opportunity arose for a work placement experience. I had an interest in anything mechanical/electronic so I accepted a four week workshop at a well-known Locksmith business in Townsville.

Each year I would attend this workshop, this continued for two years, during which time I realised that this was the type of work I very much enjoyed and would in fact like to become a qualified Locksmith.

I was offered an apprenticeship with this company which I was very happy to accept. I continued to work here until the end of 2020 expanding my skills and showing an interest in the electronic side of the business. Towards the end of 2020 an opportunity presented itself which allowed me to expand my general locksmithing knowledge and develop my skills in the field of electronic security. I am now working with the team at NQ Locksmiths.

What are some of the skills and abilities necessary for someone to succeed as a locksmith?

Undoubtedly the most important skill to be a successful Locksmith is to have very focused set of customer service skills.

As a Locksmith it is my responsibility to ensure that the service supplied is of a very high standard with a guaranteed outcome both in reliability and value. If these objectives are met then there is opportunity for repeat business and positive word of mouth.

Over the past few years, I have seen a trend in electronic security in home/business and the rapid growth in the auto industry. I have continued to learn and develop these skills through training in these areas.

At present my company is expanding into the automotive and electronic security and although extremely challenging I believe that these areas are going to become vitally important to grow and succeed in the industry

What key issues do you think will affect the locksmith industry in the coming decade and how do you think these should be approached?

Unqualified tradesmen importing and fitting substandard equipment and then leaving the repairs/fix-up to the qualified locksmith must be addressed I have lost count of the number of jobs that I have attended due to this situation.

I believe that it is important that the locksmith industry applies very strict quality standards in this area. I do believe that nationally need to advertise the benefit of using a Qualified Locksmith that use quality products and also guarantee that the product will be fitted correctly with back up service if needed.

My final thoughts on issues that will affect the future of the industry are in the area of electronic security, it will be critical that the locksmith of the future continually upgrades his/her skills and maintains up to date equipment that will allow them to service the customer

Tell us why you should be Australia's best young locksmith.

I have personally taken it upon myself to expand my knowledge in the field of electronic security whilst at the same time I have had the benefit of learning the day-to-day practical knowledge of a very experienced Locksmith. This has armed me with the skills to fix a variety of customer problems.

I believe that it is this drive and focus on both the customer and the rapid growth in the electronic security side of the locksmith business that goes a long way towards making me Australia's Best Young Locksmith.

RIGHT TO REPAIR NOW MANDATED IN AUSTRALIA

NEW SCHEME

On 1st July 2022 new laws were introduced in Australia mandating access to vehicle manufacturer information. This means that automotive manufacturers are required by law to share information inclusive of security information with approved entities outside of the dealer network. This not only promotes a fair and level playing field but also provides the customer with choice on where to have their vehicle serviced.

The Australian Government has appointed the Automotive Service and Repair Authority (AASRA) to oversee and administer the scheme. AASRA is very closely based on the National Automotive Service Task Force (NASTF) in the USA which many automotive locksmiths will be familiar with.

Access to vehicle safety and security information is understandably treated somewhat different to something like wiring diagrams. In order to access security information such as immobiliser PIN codes and mechanical key codes locksmiths will need to be listed on the Vehicle Security Professional (VSP) register. This register was initially scheduled for launch in 2023 but information to hand at the time of writing suggests that the launch date has been brought forward.

Further information pertaining to the scheme and access to the registration portal visit the AASRA website <https://aasra.com.au>

17-19 AUGUST | VISIT LSC ON STAND NO. G6

Dahua Technology is a world-leading video-centric smart IoT solution and service provider. Based on technological innovations, Dahua Technology offers end-to-end security solutions, systems, and services to create values for city operations, corporate management, and consumers.

Committed to the mission of “Enabling a safer society and smarter living”, Dahua Technology will adhere to its core value of “customer-centred,” in order to provide the market with excellent quality and service, to create more value for customers, and make unremitting efforts to build a safe, intelligent, convenient and efficient society.

Milesight specialise in the design, development and manufacturing of best-in-class AIoT video surveillance solutions including Network Cameras, NVRs, Software and App with superior image quality, exceptional flexibility and reliability.

Committed to “Better Inside, More in Sight”, Milesight has been providing products to meet the increasingly demanding security landscape and will always provide highest- quality surveillance solutions, deliver the most advanced innovation and produce user-friendly products.

HID powers the trusted identities of the world’s people, places and things. HID make it possible for people to transact safely, work productively, and travel freely.

People use HID products to open doors, access digital networks, personalize badges, verify transactions, find information, track assets and connect with others—ensuring their identities are seamlessly accepted, anywhere, anytime. With HID’s trusted identity solutions, people get effortless and worry-free identity verification experiences—with only a tap, twist, tag, push, swipe, or simply through the proximity of their chosen device.

SALTO Systems revolutionised access control with the introduction of the SALTO Virtual Network SVN data-on-card technology and the advanced battery-operated wireless electronic smart door lock range in 2001.

For nearly 20 years SALTO has been synonymous with innovative solutions, including stand-alone, cloud-based and mobile applications, that set new standards in security, manageability, flexibility and design that bring real-world benefits to virtually any door and building type. Across a broad range of industries and applications, SALTO is widely recognised as a global market leader in smart electronic access control solutions.

Over the past four decades, RISCO has become a technological leader in the global security solutions market, with millions of satisfied customers worldwide and regional offices around the globe.

Developing cloud-based security, video monitoring and verification, and connected home solutions, RISCO delivers innovative, top quality and reliable security products for every type of security and safety installation for the residential and commercial markets.

BDS TML25 MAGNETIC GATE LATCH

NEW

From the makers of the BDS key switch, the new BDS mortice magnetic gate latch is a versatile latching solution for most entry gates.

Designed to be morticed into the gate post, it will work with a standard euro cylinder or a Borg 2000 series sized keypads. It suits 40mm & 50mm posts. When fitted with a BRAVA euro cylinder it is neat and less obtrusive than other gate locks, making it the smallest gate latch solution on the market.

Designed for external or internal metal or timber domestic or light commercial grade gates, doors, access panels. The TML25 mortice latch body and strike plate can be installed to either the gate or post. Made from glass filled nylon for strength and IP67 rated it is ideal for external applications.

- 25 mm backset mortice latch
- Corrosion resistance latch bolt
- Minimum post depth 40 mm
- Face plate 100 x 30 mm
- Body 36.5 x 43.5 mm

Supplied:

- 2x euro escutcheons
- 2x strike packer 2.5 mm
- Boxed

WITH BORG KEYPADS

WITH BRAVA EURO CYLINDER

DON'T MISS THE MLAA CONFERENCE & TRADE EXPO 2022

We can't wait to see you at the beautiful JW Marriott Gold Coast Resort & Spa on the Gold Coast for the MLAA's National Conference & Trade Expo in 2022. It has been almost three years since the MLAA's last major industry event in Auckland, and we have so much to share since then!

This year's agenda includes a fantastic keynote address from Rob Redenbach, a former bodyguard to Nelson Mandela, engaging Q&A style industry discussions in a Q&A format, and a combination of skill-building and product knowledge sessions.

Dave O'Neil will be in attendance, entertaining the guests at the Gala Dinner & Awards night, where several industry awards will be presented. These include the prestigious John Andrew Apprentice of the Year award – sponsored by LSC, Silca & ABUS. As well as the MLAA Best Shop, Best Van and the Future of Locksmithing initiative awards. In addition to seeing the latest products; MLAA conferences are fantastic networking events for like-minded professionals to catch up with their industry peers.

AGENDA OVERVIEW

Please note times may change.

Thursday 20 October 2022	6:30 PM – 7:00 PM Pre AGM Drinks		7:00 PM – 8:30 PM MLAA Annual General Meeting	
Friday 21 October 2022	10:00 AM Keynote Speaker	12:00 PM – 5:00 PM Business Sessions	12:00 PM – 7:00 PM Exhibition Open	5:00 PM – 7:00 PM Trade Show Networking Event
Saturday 22 October 2022	9:00 AM – 2:00 PM Business Sessions		9:00 AM – 2:00 PM Exhibition Open	7:00 PM – 11:00 PM Gala Dinner & Awards Night

HAPPY CUSTOMERS

BLUE COAST LOCKSMITHS (NSW)

Adam Svetey of Blue Coast Locksmiths located up on the Central Coast (NSW), standing proud beside his new toy, Silca Unocode F800.

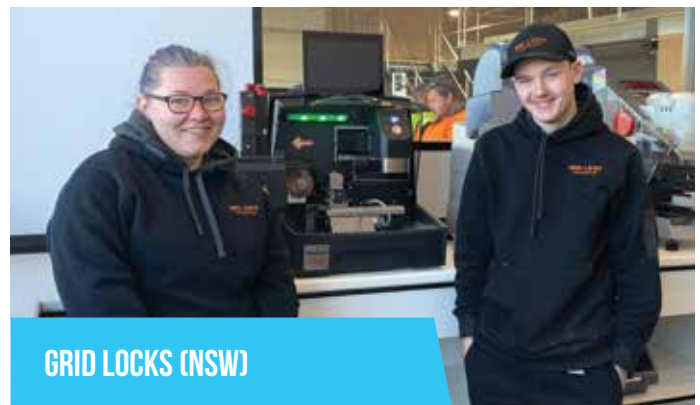

LLG SECURITY RICHMOND (VIC)

Hamish from LLG Security Richmond with his Silca Unocode F900.

ROMER LOCKS (NSW)

Andrew Meier from LSC is pictured with Gavin from Romer Locks in Port Macquarie. His wife bought a Silca Marker for him for his birthday and Andrew delivered it as a surprise!

GRID LOCKS (NSW)

Shauna & Jordan from Grid Locks ARE excited to showing off their new Silca Unocode F800.

The John Andrew Apprentice of the Year Competition recognises excellence among Australian and New Zealand locksmith apprentices. It also acknowledges the important relationship between an apprentice and their mentor, whose support is a key part of apprentices' entry to the award.

The winner of the competition, and their mentor, receive a fully-funded trip to Europe to visit the Silca factory in Italy and the ABUS factory in Germany, both world-class manufacturing facilities. This is, without doubt, the best prize in locksmithing anywhere in the world.

The award is run by the MAAA and once again LSC, Silca & ABUS are proud to sponsor this fantastic award.
