JACKSON MEREDITH

**MACLEAY LOCKSMITHS
& SECURITY (NSW)**

Please provide a short personal biography about yourself

My name is Jackson Meredith, I am 26 years old, and I live in Kempsey, NSW. In 2020 I opened my own small business, Macleay Locksmiths & Security. Since 2020 I have gone from working as a mobile locksmith to now having an established store front

I had my first look into the Locksmithing industry at the age of 15 when I started doing some odd jobs for the local locksmith, it was here that I began to consider locksmithing as a career. I have always enjoyed problem solving and working with my hands so when I was offered an apprenticeship I eagerly accepted.

What are some of the skills and abilities necessary for someone to succeed as a locksmith?

There are a lot of skills and abilities required to succeed as a locksmith, but above all the individual needs to have outstanding problem-solving skills, be mechanically minded and hold a high level of attention to detail. Precision is crucial in locksmithing and security to ensure that locks are installed, repaired, or rekeyed correctly.

It is also essential that locksmiths have excellent customer service skills in order to build trust and rapport with clients. Being respectful, patient, and responsive to their needs is key.

What key issues do you think will affect the locksmith industry in the coming decade and how do you think these should be approached?

The key issue that the Locksmithing & security industry will face over the next decade is the evolution of technology. Technology is evolving and mechanical locks are slowly being replaced by electronic and smart lock systems. Locksmiths will need to stay updated on these new technologies, undergo training, and acquire the necessary skills to install, repair, and maintain electronic locks and security systems in order to stay up to date with the ever-changing industry.

Tell us why you should be Australia's best young locksmith.

I have a genuine passion for the Locksmithing and security industry, I possess a high level of technical skill and expertise in lock installation/repair, automotive locksmithing and security systems. I take it upon myself to stay updated with the latest industry trends, technologies, and techniques through ongoing education and training.

I consider myself to be very adaptable in any situation, whether that be speaking with people or solving a technical problem

It would be an honour be considered for Australia's best young locksmith 2023.

PRODUCT SPOTLIGHT

visit lsc.com.au to see BDS Blocker Plates range!

Trade in any cloning device and receive a discount off a new RW5 (SD754590ZB) or SMART Aerial + (SD854589AD).

*Terms and Conditions: Trade tool must be surrendered to LSC. Offer expires 31.10.23

TIME SAVING SOLUTION FOR PROGRAMMING SLOT AND PROXIMITY KEYS TO VOLVO VEHICLES

**ADVANCED
DIAGNOSTICS**

NEW

The dongle connects to the vehicle OBD port and extracts the required security data freeing up SMART Pro for other jobs. The dongle stores the reading session meaning if interrupted it will commence from the previous finish point.

This means that the data could be read over a number of different sessions. The LEDs on the dongle will give a visual indication when the required data has been read. Thereafter keys can be programmed by connecting the dongle to the SMART Pro and following the programming process in the SMART Pro.

UPCOMING 2023 TECHED COURSES

Register now to attend teched@lsc.com.au

TECHED

ADP202 | 23 NOVEMBER

Transponders and Diagnostic Key Programming
Location: LSC Distribution & Training Centre, Brooklyn VIC

This course focuses on a variety of manufacturers. Utilising vehicle simulators and various tools participants will learn about immobiliser configurations, transponder preparation and programming techniques.

ADP213 | 24 NOVEMBER

Volkswagen Group Key Programming Solutions
Location: LSC Distribution & Training Centre, Brooklyn VIC

This intermediate level course has been designed so that participants gain an understanding to the design and programming of the diverse range of platforms found in the Volkswagen Group.

TECHED AUGUST WRAP-UP

Over 30 people attended a number of TechEd sessions we ran throughout the month of August. Customers travelled from as far afield as Perth & Karratha. Courses included ADP202 Transponders and Diagnostic Key Programming & ADP213 Volkswagen Group.

Key programming has changed a lot over the past decade. If you don't keep your skills and knowledge up-to-date, you're forced to experiment with a customer's car – and risk turning it into a brick in the process!

This is the third TechED course that I've attended, and it didn't disappoint. The course was well structured with a plenty of practical exercises to help solidify the theory.

I'm sure the knowledge I gained at the course will save me time and remove the guesswork out of my next job. The take home manual will also become a valuable reference for all my Volkswagen Group callouts. I can happily say it was worth travelling from interstate to attend this course.

- Ian Barnard, Tumut Locksmiths, NSW

I enrolled in the Transponders and Diagnostic Key Programming Course more as a refresher for myself. It certainly helped to reinforce the skills and knowledge I'd gained on the job over the past few years.

The main drawcard for me was the VAG Key Solutions course. I've avoided these jobs in the past due to their reputation! There was a lot of new information to take in during the day, so I was pleased the course included a very comprehensive take home manual.

In both courses, the instructor was generous with his time, and happy to answer a wide variety of questions I had about real-world scenarios I've encountered. I would certainly recommend the TechED courses to anyone interested in specialising in automotive locksmithing.

- Dominik Cook, Karratha Lock Service WA

ROBUST & ECONOMICAL

ABUS WCH90 + 9KS CHAIN

Secure bikes, valuables & equipment with the new ABUS WCH90 Wall Anchor

The new ABUS WCH90 Wall Anchor is a high-security system designed for securing your bikes in your home's garage or outside the house. This robust and economical wall anchor neatly integrates chain and anchor in one system. With the specially hardened steel housing, the wall anchor is firmly anchored in the wall with high-security special dowels, offering an extremely high level of theft protection.

The chain and the housing are made of specially hardened steel, and the chains are available in different lengths. Additionally, the ABUS XPlus cylinder ensures the greatest protection against manipulation, such as picking. The WCH90 Wall Anchor and Chain is easy to handle, and a secure solution for your bikes. The anchor can be used to secure two-wheel vehicles in garages, cellars, and houses, and it's designed for wall mounting only.

Available in three options

Wall anchor & 9KS
110mm chain

Keeping it local

Proudly Australian

DESIGNED WITH THE EXPECTATIONS AND NEEDS OF AUSTRALIANS IN MIND.

Australian partners since 1926

An international leader in the design and production of mechanical and electromechanical locking and unlocking products, ASSA ABLOY Opening Solutions is one of Australia's most successful and innovative hardware manufacturers – and Lockwood is the leading brand in the Australian locking industry.

With a well-established reputation for high quality products, Lockwood provides a wide range of Australian-made commercial and industrial locking solutions including mortice locks, electromechanical products, cylinders, barrels, keys, pins and springs.

In addition, ASSA ABLOY Opening Solutions Australia manufactures Lockwood brass and stainless steel door furniture for the residential housing sector.

With an ethos focused on local manufacturing, ASSA ABLOY Opening Solutions offer unique product solutions designed and developed in Oakleigh with a dedicated R&D team and a workforce of more than 300 production staff. Other benefits of local manufacturing include shorter lead-times, plating and finish customisation, and compliance with Australian standards and regulations.

LSC's relationship with ASSA ABLOY Opening Solutions dates back many decades to when Lockwood's founder John F. Ogden began his padlock manufacturing business in Oakleigh in 1934. LSC founder, Aubrey Johnson (the company then known as AF Johnson and Co) recalled buying padlocks from Ogden as far back as the 1930s. This relationship continues today. Together, ASSA ABLOY Opening Solutions and LSC provide appropriate market solutions, with no compromises.

KEYS

MEET THE FUTURA FAMILY

A FUTURA FOR EVERY NEED

FUTURA EDGE SD850500ZB

Replace your mechanical code machine, never worry about a card again

Designed to replace the traditional space-and-depth code machine, the Futura Edge includes every card you'll need (and you can make others if you have special keys that are common in your area).

The Edge includes a laser optical reader, so you can decode and re-code old or worn keys, and use the machine as a duplicator – ideal for basic service vans covering residential and commercial needs.

FUTURA AUTO SD8A3235ZB

Just one machine to cut every key

Cut high security track keys, or edge cut automotive keys with one machine and a special set of clamps. Specialist applications such as Tibbe or tubular keys are also covered.

The tablet allows access to all automotive cards and code series, and you can decode and re-code worn keys; or just cut keys to code on site. Reliable, comprehensive, complete. Perfect for your Automotive van.

FUTURA PRO SD847000ZB

The Swiss Army Knife of machines

Dedicated cutting stations for both edge-cut and milled automotive keys, or dimple keys. The Futura Pro gives you the functionality of up to six traditional machines, as it duplicates or code cuts household or automotive edge cut keys, dimple keys, and high security automotive track keys.

Optional jaws allow specialist keys including high security restricted types, or tubular keys to be cut on the same machine. Save space, streamline your operation, simplify training. Codes, series, cards are all included and available through the supplied tablet.

SLEEK MINIMALIST BLACK MAGLOCKS

End-users want their security products to be stylish as well as functional. Recognising this, Neptune launched a chic range of matt black maglocks back in July 2019. Install these striking black maglocks on white doors to create an eye-catching contrast, or fit to black doors for a sleek minimalist look.

- ✓ Dual voltage 12vdc @ 480mA, 24vdc @ 240mA per magnet
- ✓ Matt black aluminium housing
- ✓ Monitored, door status sensor

SECURITY EXPO 2023

SECURITY EXPO | EVENT WRAP UP

Thank you to everyone who visited our stand at The Security Exhibition & Conference. Our team had a great time reconnecting with old acquaintances and meeting new ones over three fantastic days in Sydney.

The event saw a terrific turnout, with the biggest names in Australian security coming together to ply their trade.

Our stand looked fantastic, and did justice to the revolutionary security products we had on show. This year, we featured a vast range of security solutions from Milesight, SALTO, HID, RISCO, Powershield, CS Technologies Australia & Neptune.

Our promotions were also a big success, with several visitors calling in to sign up for our PlayStation 5 giveaway competition. The lucky random competition winner was recently announced as Joel Starr from Starr Commercial Security. Thank you to everyone who took the time to enter.

To those of you who made enquiries with our team at the show, our friendly team of electronic security experts will be following up with you personally to assist as soon as possible.

HAPPY CUSTOMERS

STAUNCH LOCKSMITHS (QLD)

Matt from Staunch Locksmiths in Toowoomba grabbed a new SMART Pro and took advantage of the EOFY specials from LSC!

AUTOKEY REMOTE PROX (QLD)

Michael from Autokey Remote Prox with his new Advanced Diagnostics SMART Pro and SMART Aerial+.

PINE RIVERS LOCKSMITHS (QLD)

Darrell, Trent & Thomas from Pine Rivers Locksmiths are pictured here with their new Silca Unocode F-600 & Futura Pro.

ALL COAST LOCKSMITHS (NSW)

Here are 2 happy customers, Paul and Matt from All-Coast Locksmiths with their new Silca Unocode F100.

STU SHOWBUS ON THE ROAD IN QLD

Our Security Training Unit, STU, has made its way to Queensland! Last month, we were thrilled to attend the Locksmiths Guild of Australia meeting in Brisbane.

The event was a great success, with approximately 40 attendees who were eager to explore the latest security technology on board STU.

We'd like to thank everyone who joined us; even a thunderstorm mid-meeting couldn't halt what was a sensational night overall!!
