

RW5

Up to **3X** Faster*

RW5 Cloud Cloning Solution

Silca RW5 is the fast, easy solution able to duplicate transponders for around 99% of cloneable vehicle keys in circulation, including ID46 and ID48. RW5 is also the first worldwide solution for cloning ID49-1E Renault*, Dacia* and latest generation 7K and 6K Kia* Hyundai* models.

Cloning calculations are made using Silca proprietary servers to guarantee reliability and to ensure that the latest routines are always automatically available.

The cloning process is guided step by step via a colour display with procedures up to 3 times faster than using previous devices. Full integration with the MYKEYS Pro ecosystem gives support and information across the entire vehicle key duplication process.

CLONING PROCESS

1 RW5 reads original key data

2 Data sent to cloud for calculation

3 Cloning data sent back to RW5

4 RW5 clones the transponder to create a new key

TECHNICAL DATA

Power supply: 5 VDC mains connection via USB port. 3.7 VDC integrated battery

Connection: Wi-Fi - Bluetooth

Dimensions: Length: 145 mm, Width: 108 mm
Depth: 67 mm

Weight (unpacked): 250 g

MAIN FEATURES

FAST
Cloning process up to **3X** faster*

FUTURE PROOF
Updateable, no memory capacity limits

GUIDED PROCEDURES
Step by step via colour display

RELIABLE
Superior data processing power using Silca servers

PORTABLE
Integrated, rechargeable battery

DIGITALLY INTEGRATED
with MYKEYS Pro for full information on key duplication

* For the ID46 cloning procedure compared to the Silca RW4 Plus.

GTI PRO TRANSPONDERS

GTI PRO are the new Silca multi-transponders with a wide technology coverage to reduce inventory.
