JOEL GURNEY

JG LOCK SAFE & SECURITY, NSW

AUSTRALIA'S BEST YOUNG LOCKSMITH 2020

ABYL WINNER 2020

Joel Gurney of JG Lock Safe & Security in Lithgow, NSW has won the 9th annual Australia's Best Young Locksmith competition. Joel stood out to this year's panel of industry experts as a well-rounded applicant, who not only possessed great technical knowledge but also has excellent people skills and business acumen.

Joel was scheduled to travel to Melbourne in early 2021 to accept his trophy and prize pack. Unfortunately, with travel restrictions due to the COVID pandemic we hope to host Joel later in the year to treat him to a behind-the-scenes tour of several industry-renowned manufacturing sites.

Warren Nelson travelled to Lithgow to present Joel with his trophy and part of his prize pack.

OUR SUPPORTERS

We are grateful to ASSA ABLOY, Sutton Tools and KJ Ross for their continued support. Each of these sponsors has supported the ABYL competition since its inception in 2012. Neptune Security Products jumped onboard as a new sponsor in 2020 and has been a great addition. The support that our sponsors provide ABYL lets us run a great competition and continue to advocate for young locksmiths across the country

"Young locksmiths like Joel do a great job of keeping homes and businesses secure, and I'm sure he will make an excellent ambassador for our industry in 2021"
- Mark Johnson.

FREE DELIVERY!* for all orders over \$150 *Exclusions apply.

AVAILABLE NOW **PROMASTER KEY MANAGER 8**

Streamline key issue and return for your customers in a snap with PMKM8 from WH-Software. The latest version of the program features a completely new interface, simplified operation and upgrades to enhance security while supporting the latest operating systems.

Access features such as the new publishing server service to automate and improve security around system exports to the end user, taking away a configuration and administrative headache. System exports are now removed from email, and are almost instantaneous and automatic.

Enhanced security features for the database and exchange of data ticks an important box for corporate users, and a host of new security settings have been introduced allowing complex organisational rules to be followed.

Newly designed reports are easier to read. The new user interface removes clutter and lets users focus on the task at hand, improving usability for novice users.

TECHED | BASIC EEPROM

Online Course Testimonials

I found the course easy to follow, easy to understand and best of all didn't have to travel to do it. Have already put a new 4C chip into an early Camry and all went well. Thank you for making this course available over the internet.

 **Highly Recommended - Anthony (Just for Openers, NSW)**

I recently completed the online course version of Basic EEPROM. It was very convenient for me to do online with ample time allocated to progress at my own pace. The course material was well laid out and very easy to follow. The instructional videos were particularly helpful. It is very worthwhile doing.

 **Highly Recommended - Brett (SPL, QLD)**

SALTO

inspired **access**

UNLOCK SMARTER WITH THE TOUCH

Packed with the latest keyless and mobile technology, the SALTO Neoxx Electronic Padlock looks great while offering a unique solution to perimeter and field access control. Robust and durable, it features IP66 water resistance and dust protection for harsh environments and extreme climates. The SALTO Neoxx is a padlock you can rely on for any type of application, and complements the most complete electronic locking platform on the market – from SALTO electronic locks and cylinders to online readers and locker locks.

Ideal for Utility Providers and Property Services

Securing access to power stations, telecommunications equipment and operational technology has never been so convenient. Whether it be a remote gate, or outdoor storage area, the SALTO Neoxx Padlock can handle any environment.

- **Ultimate Protection**

Made of hardened steel with a removable shackle model option, a special armoured case with double-layered structure guarantees protection from falls, shocks, and the harshest environment or usage.

- **Technology & Design**

Incorporating the latest BLUEnet Wireless real-time technology, the SALTO Neoxx padlock allows customers to connect to their on-premise network via SALTO's SVN technology or to the cloud with the SALTO KS cloud-hosted access management platform. Access rights of lost, stolen, or unreturned keys can be quickly and inexpensively removed from the system and/or digital keys can be issued immediately to the user's mobile out in the field.

- **Smart Key**

Easy-to-use and highly secure keyless technology provides instant and reliable access to any door. Combine the advantages of RFID (DESFire EV1 EV2, MIFARE, HID iCLASS Seos), BLE (Bluetooth Low Energy) and NFC technologies. End users can easily operate the padlock with their smart card or with their iPhones or Android phones, ending the hassles and expense of lost keys:

- Up-to-date access rights directly into the user's smartphone
- Dynamic user key management
- Automatic key renewal and cancellation
- User key instant cancellation
- Update the lock's denylist via a mobile phone

- **Long-Lasting Performance**

On just a standard set of batteries (4 x LR1), the SALTO Neoxx electronic padlock gives customers the power they need to maintain their installation. Low battery status capabilities monitor the electronic padlock battery levels to make more efficient access management, minimize lifecycle costs, and reduce maintenance costs.

MEET THE NEW SALTO NEOXX ELECTRONIC PADLOCK

✓ TESTED AND APPROVED

Attack resistance: Mechatronic certification EN16864:2018.

IP66 certification: Waterproof performance and high durability.

Tested against extreme temperatures: Including freezing conditions (-35°C) and high heat (+65°C).

Make every minute count

NEW SILCA UNOCODE F-SERIES MACHINERY PLATFORM

New from the ground up, no single component escaped revision and upgrading. A dedicated team of 50 engineers invested more than 30,000 hours in the new machine. Hundreds of new drawings were made, parts designed, tested, revised and tested again over four years - and the result has arrived: Unocode F-Series. Available in a variety of models, the machine is designed to perform to the very highest standards and appeal to the most professional locksmiths. Automate, speed and simplify your operation in one hit.

The machine includes on board software and codes for completely stand-alone use, and advanced functions can be achieved by pairing it with a PC via Ethernet or Wifi. New and innovative features include optional rotary engraving on both sides of the key, an optional electromechanical automatic feeder and FIFO sorter, and an optional high-resolution camera for fast decoding. Cutters, clamps, carriages, electronics, the

chassis and shield are all upgraded and feature the latest technology to reduce noise and vibration while improving speed and performance.

All functions are controlled from an integrated industrial touch-screen (the same one found on the SmartPro).

A range of models is available to suit every business:

RISCO PARTNERS WITH LSC

LSC is the newest full line distribution partner for RISCO, a global technological leader in cloud-based security, video monitoring and verification solutions. With their HQ based in Israel, RISCO has been delivering Smart Innovation to the global security market for 40 years, with millions of satisfied customers worldwide.

The strength of the RISCO product is their all-in-one cloud-based solution that brings control and peace of mind of the security system together under one easy to use application. In the event of an alarm activation, the user will not only receive the alarm notification, they can also receive video verification from the RISCO Camera PIR, and RISCO VU Point CCTV solution.

Self-monitoring or back to base monitoring is possible using several communication paths available.

RISCO continue to bring cutting edge technology to the global security market, and 2021 will be no exception with the launch of some exciting new products.

If you are looking for a security solution that is wired, wireless, or you want to combine both technologies, RISCO has a solution that can be tailored to meet your security needs.

Red = time to renew

NOTIFICATION FROM TELKEE

As of 1st February "Hammerstone Grey" will be the only stocked colour of key cabinets and adjustable shelf cabinet.

Telkee will offer a 6 month transition period where Beige cabinets are stock prices, but after this, Beige will become a CUSTOM colour cabinet.

Beige cabinets will be available ONLY as a custom order with a 3-4 week lead time.

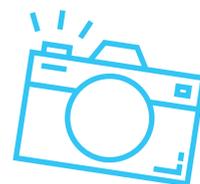

Telkee offer custom colour powder coating for an additional \$150 surcharge to cover min. paint purchase & cleaning time.

All efforts should be made to purchase Grey cabinets when possible.

All custom colour cabinets have a 3-4 week production lead time.

HAPPY CUSTOMERS

GLOBAL INTEGRATED SECURITY (QLD)

LSC recently had an opportunity to help fit out Global Integrated Security's brand new showroom in Springfield with the latest in physical and electronic security products.

These displays showcased products from leading brands such as Milesight, AMC Alarms, Neptune, CS Technologies, BDS & ADI.

In addition to these displays the new showroom will allow customers to get hands-on with a range of Borg mechanical locks, Dahua and dormakaba M5 stand alone digital locks, and they can watch Silca machinery in action through the workshop viewing window.

NORTH EAST MOBILE LOCKSMITHS (VIC)

Wayne from North East Mobile Locksmiths took advantage of our Futura trade-in deal and now has a new Silca Futura Pro in his van.

FEATON LOCKSMITH (NSW)

Jordana Featon of Featon Locksmiths with their new Silca Futura Pro.
