## ARCHER LOCKSMITHS

### 45<sup>TH</sup> ANNIVERSARY CELEBRATIONS

Justin Fleming and Warren Nelson from our NSW branch were honoured to attend the 45<sup>th</sup> anniversary celebrations of Archer Locksmiths on Friday the 21st February 2020.

Archer Locksmiths has gone from strength to strength under the careful guidance of current owners, Ross and Catherine Perkins, who purchased the business back in 1988.

The pair have a passion for the locksmith trade that is truly inspirational. Spend just a few hours with the team at Archer Locksmiths and you'll quickly see this passion is shared by all who work there.

*Congratulations Archer Locksmiths on reaching such an incredible milestone!*

Alongside managing a successful business, Ross and Catherine have supported a raft of apprentices as they work to achieve their trade accreditation. Once such apprentice, Thomas Collins, even won the Australia's Best Young Locksmith (ABYL) award back in 2016!

Milestones like this give us a chance to thank businesses like Archer Locksmiths for the important role they play in protecting the future of our industry. Through their ongoing support of the MLAA and mentorship of young apprentices, Ross and Catherine have helped build a bright future for locksmithing in Australia.

It is great to see the Archer Locksmiths community get together and celebrate this wonderful milestone.

## ID49 CLONING FOR HONDA – FREE UPGRADE

Grab your free RW4Plus software update now and be ready to clone ID49 chips for popular Honda vehicles. This is a first in the world, and it's a free software upgrade from Silca. Silca have launched a new T49 chip as the target which is available and in stock now, and this, along with the new Universal 'U-Snoop' lets you add to your arsenal of clonable keys.

*WORLD FIRST!* →

### SILCA RW4 PLUS SD744057ZB

- Extremely reliable, easy to use, no fuss cloning device
- Virtually all keys are cloned offline
- Doesn't upset the vehicle, full compatibility to OEM code structure
- Add the new Universal U-Snoop (SD7A2635ZB) for Honda ID49 cloning
- New T49 target chip (SC104902)
- The new Universal U-Snoop replaces both the M-Snoop and P-Snoop for streamlined operation
- Optional M-Box for full ID48 cloning
- Optional Com-Code for reliably and intelligently programming Commodore keys

**ADVANCED  
DIAGNOSTICS**

## ADVANCED DIAGNOSTICS 20TH ANNIVERSARY

*A1 Locksmiths*

I have used the SMART Pro hundreds of times it's the go to programmer for both new and old vehicles, with very minimal training you can pull pin codes other programmers can't, read fault codes and program keys, it's straight forward menus allows quick and easy access to vehicles without sacrificing access to more complex options like searching by systems instead of just year make and model. I would recommend this programmer as a first choice in all scenarios.

**- Kain, A1 Locksmiths**

Simple and easy menu to navigate and I was always given quality support when needed.

**- Robert, A1 Locksmiths**

Good machine. Easy to use.

**- Steve, A1 Locksmiths**

## NEW UPDATE

# Out-of-the-box access control with SALTO KS

SALTO KS (Keys as a Service) provides flexible, cloud-based, wireless access control that is incredibly easy to install and maintain, and even simpler to use. Even better, SALTO KS is now compatible with SALTO's XS4 BLUEnet lock range which includes the revolutionary XS4 One and stylish XS4 Mini – so what are you waiting for?

## ANYWHERE, ANYTIME

Your customers can manage cloud-based access control from anywhere, on-the-go, simply by using the KS app or a web browser. They can send a Mobile Key to anyone with a smartphone, with no need to hand over tags or even do a remote opening (even though you can do that too). Issuing and receiving access has never been easier or more flexible.

## EASY TO INSTALL HARDWARE

SALTO KS sites simply consist of SALTO wireless locks and/or wall readers and IQs. The IQ serves as the brain of the site, connects the wireless locks to the cloud and can be extended by adding additional repeaters if needed.

## REDUCTION OF OPERATIONAL COST

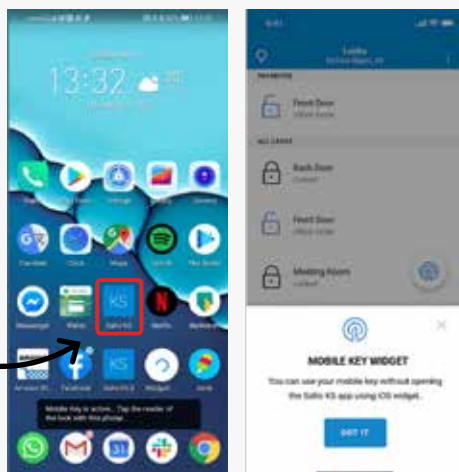

Cloud access control doesn't need any effort on a customer's part to maintain or manage. It is always up-to-date with the latest features via instant updates and add-ons. Being cloud-based, there's no need to purchase software licenses, install and manage complicated and expensive IT equipment, or worry about ongoing maintenance and back-ups. Nor do you need to spend weeks learning how to operate a KS system!

## RECURRING REVENUE

Customers unlock the functionality of their account with a 1-year KS voucher (or subscription), so you earn while you sleep each time they renew!

## MOBILE KEY WIDGET

With the Mobile Key Widget for iOS and Android, SALTO KS offers an enhanced customer experience where you don't even have to open your app anymore. This simple application extension resides on any available Home screen for quick access.

## PIN CODE

SALTO KS has introduced a new PIN code system to offer more convenience to users. No credential or phone is needed to operate SALTO KS devices that are equipped with keypad readers such as SALTO KS wall readers or SALTO KS keypad escutcheons. With this new feature SALTO KS now offers 4 different ways to access your building, SALTO KS tag, Mobile Key, Remote Opening and PIN Code.

Also available in White

### CHECK-IN CHECK-OUT

Check-in & Check-out is the latest addition to the SALTO KS timeframe family which includes 'Custom Schedule' and 'Always Access'. With Check-in & Check-out, guests are able to walk in and out according to the pre-set timeframe they booked. Bypassing the front desk can result in decreased waiting times at the front desk, improving the guest experience.

**FREE DELIVERY!\*** for all orders over \$150 \*Exclusions apply.

**OTHER MODELS COMING SOON**

## MECHANICAL DIGITAL CAM LOCK ECP

This smaller footprint keypad features Easi-Code Pro (ECP) code changing, making it easy to update the code regularly. Install onto lockers, cabinets, key cabinets, cupboards or joinery.

### Digital Lock Cam Lock BL1006SCECP

- Fully mechanical digital cam lock
- Non handed (suits left and right doors)
- Easy to install
- ECP (on door code change)
- For timber or metal doors (suits door thickness up to 25mm thick)
- Supplied with two cams and mounting hardware
- Suitable for internal use
- Finished in satin chrome

## THANK YOU ABUS

A huge thank you to my sponsors ABUS Security Tech Germany!

We've established ourselves as a serious contender in the Superbikes Class this season, and against some very tough and experienced competition.

None of this amazing journey would not be possible without the support and innovation of the ABUS Security Tech Germany Team and brand.

When it comes to racing, if you LOVE IT? LOCK IT!

- Stacey Van Wattering
