570 CYLINDER WITH X & Z CAM
AB570UCYLCKD

Precision 6 pin oval cylinder that suits most oval cylinder mortice locks. With X cam function and supplied with Z cam in the box.

83/50 DUAL SHACKLE PADLOCK
8350NKD x 2 | 8350SA60 Short Shackle
8350SA105 Long Shackle

Shackles also available in stainless steel.
ABUS 83/50 dual access padlock allow two different profile keys to access the same locked gates, chains or bollards.

GRANIT FLOOR OR WALL ANCHOR
WBA75

Perfect for securing two-wheel vehicles in garages, cellars, at houses and carports. The WBA 75 is weatherproof and can be installed indoors or outdoors.

GATESEC™ ROLLER DOOR ANCHOR
AB138C

The new GateSec™ AB138 is solid stainless steel construction "rust free by design" and includes all mounting accessories. Designed for securing on the inside of roller doors and shutters

SQUARE LINK CHAIN 10MMx170CM
10KS170BLK

ABUS Square link hardened chain are ideal for securing a range of applications from equipment, machinery & gates. With corrosion protection & protective fabric sleeve they are ideal for outdoor use.

83/55 SERIES PADLOCKS
8355NKD

83/55 Series Padlocks have a hardened Steel body & Special hardened alloy steel shackle with Nano-Protect™ as standard. Designed for high security applications & are SCEC approved for SL3 (with approved keying system & key retained).

60MM DOOR FRAME REINFORCEMENT KIT

Properly securing double leaf aluminium 'shopfront' type doors can be tricky when egress is required. With factory break-ins on the rise, we've got an easy to install solution. The Striker Products door frame reinforcement kit features a special stainless steel bolt and plate set that engages the hook bolt, dramatically reducing the ease in which these doors are pried open, while maintaining the lever-egress function.

- Boosts security and strength on narrow stile aluminium doors prior to break-in
- Stainless Steel, Australian Made, 60mm and 120mm thickness version available

Replaces broken strikes and covers damage on narrow stile aluminium doors!

KEYSAFE™ SLIMLINE

KEYSAFE™ PERMANENT

KEYSAFE™ PRO

KEYSAFE™ ORIGINAL

Resettable pushbutton combination | 1024 possible combinations | Mounts easily (screws included)

A KIDDE KeySafe™ provides controlled access to your home without duplicating, distributing, and tracking physical keys. There has been a huge change in the way the Real Estate industry is conducting its business, with Open Houses now being organised on a one-on-one basis to enforce and ensure social distancing.

Rather than arranging a big group to inspect a house at one time, Real Estate agents are obliged to let potential buyers or renters view a property one at a time. This creates a huge headache and workload for them, so give them the opportunity to manage that easily and safely with a KIDDE KeySafe™

A code can be set at the start of the day, given to viewers by SMS, Whatsapp, Email, Facebook Messenger or another service, then easily reset at the end of the day.

PRODUCT SPOTLIGHT

SECURE6 MASTER KEY SYSTEM

From a single door, to a multi-storey building a **SECURE6 Master Key System** has you covered. SECURE6 has protection against illegal duplication by design registration until 2029 which will give your customers peace of mind knowing their SECURE6 keys will never be cut without their knowledge or approval.

You can now enjoy expanded coding capabilities with SECURE6 thanks to the addition of a new barrel profile, S6B, earlier this year. This new profile can be opened using the corresponding S6B profile key, or the new S6M master key.

Not only does SECURE6 offer your customers the convenience of a master key system, it also offers strong defence against picking, drilling and other forms of unauthorised entry.

NEW

UPDATES FROM SALTO KS

Let your tenants manage their own space with Pod

Today we are happy to welcome yet another new feature to the KS family. This addition to the SALTO KS and KSConnect API enables building managers (Site admins) to create a small independent group of members named 'Pod'.

With the new Pod functionality building managers get the chance to outsource access control management to their tenants. This feature will help keep an overview of their buildings' operations and save them a lot of time.

XS4 BLUEnet lock range now compatible with SaltoKS

SALTO KS (Keys as a Service) provides flexible, cloud-based, wireless access control that is incredibly easy to install and maintain, and even simpler to use. Even better, SALTO KS is now compatible with SALTO's XS4 BLUEnet lock range which includes the revolutionary XS4 One and stylish XS4 Mini.

Your customers can manage cloud-based access control from anywhere, on-the-go, simply by using the KS app or a web browser. They can send a Mobile Key to anyone with a smartphone, with no need to hand over tags or even do a remote opening (even though you can do that too). Issuing and receiving access has never been easier or more flexible.

Mobile Keys can work offline

The Master key or 'Offline Access option' allows a user to open the doors to which he or she has permissions defined, even when the IQ is offline or disconnected.

If the Site contains RFnet locks within the Site, then the offline access storage is 39 per Site. But if the whole Site is equipped with BLUEnet locks, then Offline keys storage is 360. Salto have future plans to improve this logic per lock, where the storage will be 39 for RFnet locks and 360 for BLUEnet locks within the same Site.

COMMERCIAL SEC

Top 5 pro

Due to Covid-19, Locksmiths and Security Installers are being called on to boost security in a wide variety of settings, but in particular we're seeing a lot of activity around security for commercial premises.

Our industry provides an essential service, and allows businesses to hibernate safely, or to protect their properties if they're obliged to close or alter their trading hours.

MAY 2020

**GOVERNMENT
ANNOUNCES
\$80 BILLION IN
BUSINESS SUPPORT**

We know that not everyone is thinking about tax time, but the government has announced a very generous extension of two programs to support small and medium businesses.

Talk to your accountant now, and make sure you don't miss out on the chance to offset any profit in your business against these investment write-off programs.

We have some fantastic offers available on high quality machinery that will serve your business now, and for years after the bounce-back.

There are two programs you should be considering:

1) Instant Asset Write-Off:

Is now increased to \$150,000, and expanded to include businesses with annual turnover of \$500 million, and this applies up until June 30th, 2020. The higher threshold provides cash flow benefits for businesses that will be able to immediately deduct purchases of eligible assets each costing less than \$150,000. The threshold applies on a per asset basis, so eligible businesses can immediately write-off multiple assets.

From the 1st of July 2020, the extension will end. It will only be available for assets up to \$1,000 and for businesses with turnover less than \$10 million – so you need to move quickly to take advantage of this one.

2) Business Investment Incentive:

For asset purchases that don't qualify for the above IAWO relief (i.e. because it exceeds the \$150,000 threshold or was not purchased before June 30th, 2020), the government has introduced an investment incentive through to June 30th, 2021. Businesses will be able to deduct 50% of the cost of an eligible **NEW** asset on installation, with existing depreciation rules applying to the balance of the asset's cost.

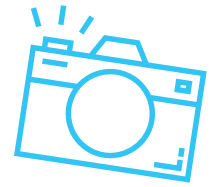

**This isn't financial advice, talk to your accountant or registered financial practitioner for applicable advice to suit your business and situation.*

A MESSAGE TO OUR CUSTOMERS

I thought I'd write and share some thoughts at these unprecedented times.

I feel confident that the Security industry in which we work is an essential one. I know our customers are servicing multiple essential industries such as health care providers, critical infrastructure, police, military and government sites, and talking with customers some of these areas are busier than ever. Sadly, that is offset by a drop in many other areas – however that is also providing work for our industry as sites that sometimes open all hours must now close, and improvements in security are required.

I've seen the resilience and effort put in by our team to ensure service continuity to you, our customers, and I'm very thankful for their efforts. We've implemented a wide range of measures to protect our team and our customers. We're working to continue to deliver the products you need to secure your clients' properties on time.

Our team are working remotely wherever possible, and our investment in technology over the years is allowing us to operate with the very minimum amount of disruption. I'm pleased to see how well customers are adapting to online and electronic order placement, and using the knowledge of our team to organise their orders for pickup or despatch. We're making detailed contingency plans, and I very much hope we don't need to use them!

We are proud to work with the very best suppliers - and in general terms, this means that while there are some very minor hiccups, there are no serious supply chain interruptions to our business right now. Stocks of goods are available and continue to flow normally.

Please reach out to our team who remain here to look after you, and to ensure you can perform the essential services your clients rely on to keep them safe.

- Mark Johnson

STAY ONE JUMP AHEAD WITH KEYLESS WIRELESS ACCESS CONTROL

The world is changing, and businesses need smarter security systems. They want them to be flexible, automated and easy to manage from anywhere at anytime. SALTO's smart access control platform is designed to give your customers ultimate freedom of choice regarding technology, type and number of access points.

Show them what security can look like.
