NON-SLIP WORKBENCH MAT

- Silicon mat
- 450 x 300mm
- Ideal for soldering or other intricate tasks
- Keep small components ordered and compartmentalised

Protects bench surfaces

RFID KEY HIDER POUCH

Keyless entry fobs for vehicles are vulnerable to spoofing attacks. Targeted thefts of vehicles trick the fob by capturing its signal via a type of boosted relay attack. Prevent this by storing proximity keys in a special RFID blocking container, such as the Lucky Line key hider pouch.

- Special RFID signal blocking fabric prevents communication between the key and car
- Stops electronic pickpockets
- Adhesive pad sticks to just about any surface for convenient mounting
- Keyring allows you to keep it with the rest of your keys

USE FINANCE TO GROW

Grow faster than the curve

More and more customers are finding out that using finance provides flexibility, growth opportunities, and financial benefits beyond those you might initially think about. With generous government incentives still available for business investment, we encourage you to talk to your accountant or financial advisor to see if equipment finance is right for you.

Here, LSC talks to Matt Cook from Mattlock in Sydney about how financing options on equipment helped him grow his business.

see Silca flyer for EOFY sale!

LSC: Morning Matt, thanks for talking to us about why you explored financing your recent equipment purchase. Can we start by asking what made you think of using Finance in the first place?

Matt: My Accountant suggested it as it would be advantageous for tax purposes.

LSC: And was there anything else?

Matt: As a side benefit, it also allowed me to free up cash which I could preserve and then use to grow my business in other ways. That wasn't on my radar to begin with but it was a great side-benefit.

LSC: And was the process easy?

Matt: My finance provider organised a single, fixed, monthly payment. I could schedule this and I knew it was coming every month so I felt like it was very controlled and manageable.

LSC: Would you recommend Finance to other customers?

Matt: I reckon every business has different requirements, but from my point of view it's worth asking the question to your accountant as it might be beneficial in ways you hadn't thought about.

LSC: Thanks Matt, we appreciate your time!

Ask your Account Manager if you need more information, we can help get the ball rolling for you.

* This isn't financial advice. Your circumstances may differ, and we urge you to consult your Tax or Financial professional for advice tailored to your circumstances. Information provided here is of a general nature only.

Are you getting the most from your Futura?

If you're not subscribed to updates for your machines, you could be missing out. In the last year, Silca have released hundreds of new cards, key systems and code series for the Futura, Futura Pro, Futura Auto and Futura Edge.

Depending on the machine, updates have been released for vehicles and locks relevant to our market including Mahindra, Tata, WT, Yale, Suzuki, Chrysler, Trimark, Federal, ABUS, GreatWall, LDV, Carryboy, Hyundai, Cherry, Hyundai, EuroLocks, Whitco, Chicago, Volvo, Hafele, Ford and Mazda (along with a load of other brands you won't normally find here).

Updating is simple. Just ask your Account Manager to organise a Subscription, then you can download all the updates to a USB stick for offline updating (often useful when your machine is in a van), or you can do it online directly from the machine if it's connected.

SALTO delivers flexible and cost-effective access control for schools like St Rita's College

St Rita's College is an independent Catholic day school for girls from Years 7–12 in Clayfield, Queensland. With a large and diverse campus, the College had significant challenges ensuring the safety and security of staff and students, as well the protection of valuable assets.

With SALTO Certified Partner, Network Locksmiths and Security, St Rita's College commenced deployment of a SALTO access control system in 2017. Today, it's a virtually keyless campus.

“

SALTO provides you with peace of mind; that when you leave for the day, the site is secure and can be managed remotely. The ease with which the system is maintained and managed is exceptional and has provided us with a terrific outcome.

- Ed Gleeson
Business Manager
St Rita's College

”

Says Belinda Parker, Director of Network Locksmiths and Security, 'We had the pleasure of working with St Rita's College to progressively roll out the SALTO access control system to all their buildings, including those that are heritage-listed. We also worked closely with the architect and electrical engineers for the stunning new Trinity Centre, a state-of-the-art learning precinct that includes a 400 seat auditorium. The SALTO XS4 electronic lock range was installed on over 300 doors of all types; including auto doors, gates, car parks, and lifts. It has enabled the College to have complete control over their security and respond real-time in an emergency.'

The SALTO Virtual Network (SVN) and RFnet capability for online and offline doors, as well as lifts, gives the school full audit trails, the ability to grant access to specific rooms or areas for selected time periods, and to adjust locking schedules quickly and easily. SALTO GEO cylinder locks and GEO padlocks have also been fitted to gates and pool entry points. These are fully integrated with the XS4 platform and are an ideal solution for access points where fitting an electronic handle set is not suitable.

The SALTO access control system has aligned seamlessly with St Rita's College requirements, and the school is delighted with the results.

Their Business Manager, Ed Gleeson, sums it up, 'SALTO provides you with peace of mind; that when you leave for the day, the site is secure and can be managed remotely. The ease with which the system is maintained and managed is exceptional and has provided us with a terrific outcome.'

SALTO AND LSC

To get started with SALTO, LSC can help you with pre-sales support to system implementation – just ask.
