For Renault

SILCA Remote Auto 3B Flip Blade HU66. ID48-A2

SHU66AR09 is the latest addition to Silca Proximity, Slot and Remote Key offering. This release brings the lookalike range to in excess of 40 products relevant to our market. The Silca Remote Car Keys are packed individually in a plastic clamshell for easy identification and hook display and are programmable with Smart Pro or similar.

SHU66AR09

ADA SMART Pro Bypass Cable for Renault

The Renault® Bypass Cable allows for direct connection to the vehicle's Body Control Module (BCM) and in doing so bypasses the secure gateway module. The two 40 pin connectors, male and female, plug directly into the BCM.   The two 16 pin connectors are used to connect the Smart Pro to the vehicle OBD if power is needed. Applicable to proximity key programming on later models.

SD755649AD

NEW SAFETY STANDARDS FOR COIN CELL BATTERIES

In 2020 the government announced new safety standards for nearly all products containing coin cell batteries. The standards are designed to ensure consumer safety, specifically around the possibility of infants ingesting coin cell batteries which could cause serious injury or even death.

COMING SOON

From June 2022 these new standards are mandatory, and require all parties in the supply chain (manufacturers, importers, distributors and retailers) to take responsibility for coin cell battery safety.

While the legislation is complex, the intent is clear – products designed for consumer use must conform to design standards that reduce the chance of the battery being accidentally released. New packaging guidelines are also being introduced.

LSC has worked with our suppliers to ensure compliance, and over the next few months you'll notice new packaging and changes to some products to ensure they comply.

Head to www.productsafety.gov.au for more information.

RISCO LIGHTSYS+
DOOR ACCESS CONTROL

NEW FEATURE - COMING SOON!

The new LightSYS+ from RISCO is already packed full of features but soon these features will be enhanced even more with the release of Door Access Control.
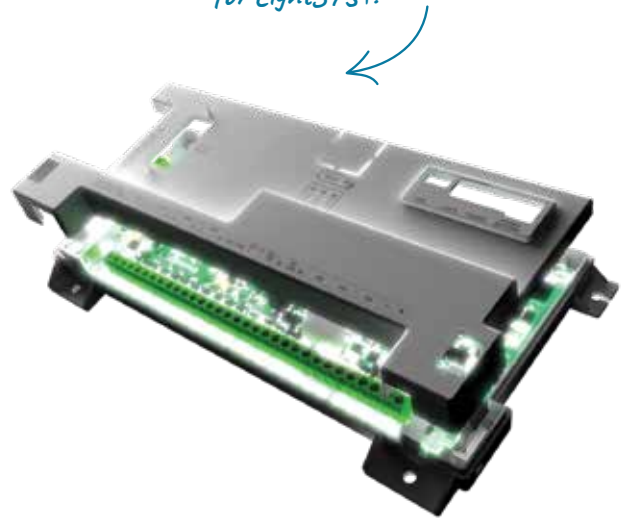

Using the newly developed RISCO Prox reader, which is connected to the RISCO Bus, users will be able to control up to 32 doors. The readers will be automatically assigned to the panel according to the serial number on BUS (no dip switches) making connection and setup seamless.

Users will be able to arm and disarm the system using an RFID tag. 3 badge arming allows the User to Arm a partition by presenting an RFID Tag card at a reader three times within a short period of time and disarming the system by presenting an RFID Tag once to open the door and Disarm the specific Partition.

Other functions in the new Door Access control feature include:
- Defining the user output from the output list
- Door Control Time - defines the time between when the user passes the proximity tag on the reader till the doors locks again. Enter the Pulse time (in second) to define door opening time
- Door Open Too Long (DOTL)
- Door Control Schedules

Stay tuned for more updates on the release of this great new feature for LightSYS+.

FSH MONITORED ELECTRIC MORTICE LOCK

The FEL990M Electric Mortice Lock is a true multi-functional locking device. It has been developed for simplicity - simplicity for the stocklist, the installer and the end user. The lock is tested to 4 hours on fire door assemblies as specified in AS/NZ 1905.1 1997 Part 1 Fire Resistant Doorsets and is supplied with a 3m cable with 12 pin plug which makes it retrofittable with other popular Electric mortice locks on the market.

The FEL990M Series locks can be easily site configured as follows:
- Single-sided locking (vertibute) / double-side locking (combination)
- Power to lock (fail safe) / power to open (fail secure)
- Left hand / right hand operation

and includes comprehensive monitoring:
- Door position monitoring by reed switch
- Lock status monitoring by a combination of 3 locking parameters:
  - locking bar (Hub/Handle/s locked
  - deadlatching bolt (depressed)
  - latchbolt (out)

NEWS AND EVENTS

LSC DISTRIBUTION & TRAINING CENTRE

MLAA VIC BRANCH MEETING

Date: Wednesday 8 June 2022
Time: 6:00pm – 9:00pm
Where: LSC Distribution & Training Centre | 4-16 Export Drive, Brooklyn VIC 3012

LSC is looking forward to hosting the next Victorian MLAA Branch meeting at our Distribution & Training Centre in Brooklyn this month. Food and drink will be supplied and a swag of door prizes will be raffled off to lucky attendees. There will be lots of products from LSC on display, and our Account Managers will be on hand to answer any questions you may have.

RSVP by Wednesday 1 June: bcoward@lsc.com.au

2022 ABUS VISIT

During May, LSC were delighted to be joined by two visitors Christian Jerger and Fabian Mayer from our close partner ABUS in Germany. Having heard that our ABUS visitors were here in Melbourne, Stace drove out to our distribution centre to meet them on the 27th of May.

Both Stace's trailer and RSV4 bike were decked-out in brilliant red ABUS branding, sporting the famous 'Love it? Lock it' tagline. LSC and ABUS are proud to collaborate as sponsors for Stace and were thrilled to see how amazing the bike looked from up close.

Stace has been doing exceptionally on the track recently and has cemented herself as one of the leading racers in the Hartwell MCC championship. Follow our social media channels to stay updated, or follow Stace directly on Facebook, Instagram or YouTube **@Lucky Stace Racing.**

SECTECH ROADSHOW 2022 REVIEW

SECTECH ROADSHOW

Throughout May, LSC were privileged to take part in the SecTech Roadshow.

SecTech is one of our favourite events on the calendar, and this year was no different. We showcased a fantastic range of electronic security products from Milesight, RISCO, SALTO & HID.

Visitors were delighted to see the latest and greatest electronic security innovation on display. Our stand was also jam-packed with giveaways, with our LSC socks proving to be highly sought after.

Beginning in Perth, we toured on to Adelaide, Sydney, Melbourne and Brisbane. We were delighted to reunite and meet with customers, friends and colleagues from across the electronic security industry.

It's fantastic that LSC has become so integral to electronic security installers across the country. Thanks for joining us at SecTech; we hope you enjoy your new socks.

ABOUT SECTECH

SecTech Roadshow is a touring tradeshow that covers 5 Australian state capitals over 2 weeks every year in May and draws 2000-2500 high-quality attendees.

The compact size and local venues make SecTech Roadshow the perfect opportunity for installers and end users to get face time with leading suppliers and manufacturers and their solutions in a vibrant half-day event.
