Help your customers create a Covid-19 safer world with our big range of Reduced Touch products.

Anyone owning or managing a commercial building now has an obligation to review their site and consider risks to themselves, their employees and their customers from touchpoints.

Purehold™
PSLEVERRTD

Lever Antibacterial Door Handle Cover

Using silver technology, the coating combats pathogens deposited onto the surface by users and then works continuously, 24/7. Aimed at reducing cross-contamination from one user to the next, the Purehold LEVER is easily installed onto door handles by simply "snapping" into place in under 30 seconds. Fits most common lever handles (please visit lsc.com.au to confirm compatability)

• Proven in the lab to kill 99.9% of bacteria, using silver technology embedded into handle surface (independently tested to ISO 22196)

Purehold™
PSHH001

Pro Gel Dispensing Hygiene Handle

Purehold PRO gel-dispensing hygiene handles use a virucidal gel (tested to EN14476) that has 80% alcohol content which has been proven against viruses similar to Covid-19.

• Strong stainless steel frame (compliant with BS 8424)
• Independent tests prove the Hygiene Handle to be 98.5% cleaner than a standard door handle

Air 4 Home Remote Controller

The Silca Air4 Home is a wireless, battery operated, Bluetooth enabled module that will bridge the gap between your smartphone and your existing garage door or gate.

The battery powered device is an emulator for the original remote. Then you pair to this device from the Silca Air4 Home app on your smartphone and can share accesses via SMS, Email, Whatsapp and so on.

• No wires, no internet, no wifi, no power needed
• Administrator can give up to 21 accesses

Temperature Monitoring Terminal Kit

Designed to help manage access through contactless access control Facial Recognition (FR) technology with the added feature of accurately monitoring human body temperature using thermal camera.

The Dahua Temperature Solution measures the body temperature using a non-contact precision thermal camera with a measurement rate of up to 3 people per second, the system can handle high flow rates of people through your access controlled areas.

Smart Mortice Strike, 30 Users

The Verroo smart range of locking devices has been designed with security, flexibility and convenience in mind. Utilising Bluetooth technology with AES128 encryption you can be sure when communicating and sharing access to your Verroo, you are doing so securely and with zero web presence. Administrator can give up to 21 accesses

• Controlled by the Verroo App
• 3 Access levels, Owner, Admin and Normal
• Up to 30 users
• Timed access eKeys

alhua TECHNOLOGY

Reopen Your Business Safely
Business Solutions from Dahua Technology

Dahua Retail Flow Control Solution - single entrance kit

Offer your customers accurate, real-time occupancy monitoring with the Dahua Retail Flow Control system. Powered by a custom configured Dahua AI camera, the system automatically counts people entering and leaving a single entrance. An alert or alarm can be set to trigger if a person attempts to enter the space once the individually configured maximum threshold has been reached.

The screen overlay on the monitor provides an easy-to-read live status of the current in / out counts. A siren or strobe can also be configured through the alarm output on the camera to provide an alert should the threshold count be exceeded.

This system alleviates the need to have a staff member stationed at an entrance for counting purposes, making it an attractive solution for a wide range of businesses that need to restrict the flow of visitors for distancing purposes.

Part code: DHFLOWCTRLKIT1

|		
Reduce staff required for people counting	Trigger alarm when maximum capacity is exceeded	Single entrance solution

Dahua Temperature Monitoring and face recognition stand alone terminal kit

Designed to help manage access through contactless access control Facial Recognition (FR) technology with the added feature of accurately monitoring human body temperature using a thermal camera.

The Dahua Temperature Solution measures the body temperature using a non-contact precision thermal camera with a measurement rate of up to 3 people per second, the system can handle high flow rates of people through your access controlled areas.

Compared to the traditional methods of on-site body temperature measurement, using a Dahua Thermal Solution can significantly improve speed and accuracy, and at the same time, help reduce cross-infection by using non-contact technologies.

Part code: DHTHERMALKIT3

Supports mask detection	Trigger alarm when anomaly temperature is detected	Facial recognition distance 0.3 m–2.0 m

CREONE

CREONE VALUEBOX CONTROL

The New Creone ValueBox Control enables staff and organisations to simplify administration and improve security for sensitive or expensive equipment and personal belongings. Its updated design is customisable and now makes it possible to store bags, laptops, projectors, cameras, and other large items within the one ValueBox solution.

The ValueBox Control is managed through the new KeyWin 6 Web Hosted service allowing control of your key management and valuable management through one simple to use platform and means it can also be accessed from any PC, Mac, and Tablet worldwide.

Part code: CR141370 (Main cabinet only)

- Fixing centres: 83 mm
- Dimensions: 115 (L) x 70 (W) x 38 mm (D)
- Weight: 0.2kg

NEDLANCBMR

A MESSAGE TO OUR CUSTOMERS

As I've been talking to customers and our team about the last few months, a few things come up again and again that I think are worth reflecting on and sharing.

Covid-19 has forced nearly every business and industry to adapt and change, and we're included. The lockdowns that were forced upon us (and thankfully seem to have had the desired effect, despite the economic damage) made us accelerate our use of technology. And wow, did we have the pedal to the metal. LSC, like many companies, had dabbled with video conferencing, but it wasn't the norm. Overnight, we had to do it – and we've (mostly) got used to it. Our team are using a big variety of platforms to stay in touch with each other, with suppliers, and with customers. We've learnt to Skype, Zoom, Team, Meet and more. If there's one thing we've done more than ever before is communicate electronically – and I see it as a good thing.

Having said that, we are and always will be, a face to face, relationship company. I know our Account Managers can't wait to get out and visit and support our customers and discuss new opportunities with you.

On the product front, I don't think I've ever seen so many new products being trialled and tested in such a short time. There really is something for everyone, but I'd say there are more opportunities than ever to adapt, change and embrace Electronic Security. We're offering thermal camera solutions (big and small) and cameras that count customers in and out of any space. There's thermal everything on the cards coming soon. Touchless solutions involving readers, door automation, sensors and so on are changing the way everyone works. The entire reduced touch sector is an opportunity that's very relevant now, and is an exciting and an easy up-sell for you to add to your business.

The MLAA's recent membership survey showed more than half of all locksmith customers saw Covid-19 as an opportunity to diversify their businesses and learn new things - be it Electronic Security, automotive, or business related. LSC offered all kinds of training during this period, and we're planning many more in the near future.
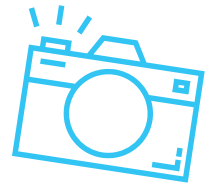

All of this makes me feel positive about our industry in the year ahead. Yes it's likely the economic damage will be fairly widespread, and some areas will suffer. Businesses that are adaptable and flexible can prosper through technology, training, new product lines and leveraging their expertise in new ways. Customers still need service, and those who invest are likely to come out stronger than ever.

I thank you for your support during this period, and look forward to us supporting you in your business like never before.

Regards,

– Mark Johnson
