INDUSTRIAL STRENGTH. PROVEN RELIABILITY.

The heavy-duty Borg BL7701ECP is available in MGPRO finish or satin stainless. The BL7701 features ECP with built-in key override in the lever. The cylinder is a SFIC (small format interchangeable core) cylinder.

The rotation of the key engages the lever handle. The keypad lever clutches and only engages when the correct code of key is entered.

An ideal retrofit upgrade for our own standard BL5000 and competitors Unican 1000 or 5000 models, where frequent code changing is required.

Features:

- Fully mechanical digital lock with key override
- With a SFIC cylinder on Silca profile BES1
- New Easi-code on-door code changing procedure
- 8 mm square drive suitable for mortice locks
- 60 mm heavy duty stainless steel tubular latch
- Fully reversible
- Suits doors from 35-80 mm thick
- Up to 1024 codes to choose from
- Available in MGPRO or satin stainless finish

BDS TML25 UPGRADE

Following the release of the BDS TML25 in June 2022, the supplier has listened to industry feedback & end user experiences. As a result, the supplier has recognised the need for improvements.

The improvements have resulted in the standard TML25 being run out & replaced with 2 new models.

Whereas the TML25 model could be used for a Euro Cylinder & with a Borg digital lock, some issues were experienced from fitting & installation.

The new models are lock specific, one for use with a Euro cylinder & a separate one for use with a Borg Digital Lock.

The change means less alignment or binding issues from fitting.

**BDS Mortice Magnetic Gate Latch Body to suit
Euro Cylinder Only (Trencab)**

SALTO'S U SPINDLE KITS

More doors, more options

The Salto U Spindle Kit comes with three pre-sized 7.6 mm split spindles (A, B, and 5) to suit door thicknesses from 35 to 48 mm, solving the common issue of mismatched spindle length.

It also includes an 8 mm solid spindle (3) compatible with ANSI and Euro mortice locks for doors 32 to 47 mm thick.

Just grab the size that matches and go.

INSPIRED ACCESS

TOP UP ON THESE SILCA GO-TO AUTOMOTIVE CONSUMABLE PRODUCTS

Silca "Look-A-Like" Automotive Remotes

A quality range of automotive remote keys, flip keys and proximity keys that are designed to replicate the look and feel of the originals. Don't risk remotes that fall apart after a few uses, or require fiddly programming or configuration – these are ready to go out of the pack, are battery safety compliant, and will feel comfortable and familiar for your customer.

Silca Transponder Empty keys

Ideal for when the customer just needs a spare mechanical key with a transponder chip inside it, Silca's famous range of blades and profiles is matched by a head-shape matching the original for customer familiarity and vehicle compatibility. Easy to cut, and guaranteed to conform to the OEM blade specifications for no fuss spare key replacements.

Silca Shells

With over 100 shells in the range, there's sure to be a high quality Silca shell to suit your application. With shell damage causing a high proportion of transponder key replacement need, these provide a profitable, easy, time saving way to refurbish your customers keys. They'll look and work like new, and won't be at risk of breaking.

DAHUA IP VIDEO SURVEILLANCE SYSTEM (IPVSS & VIDEO INTERCOM SYSTEMS (VIS) ASSOCIATE CERTIFICATION (DHCA)

ESC801 | (7hrs) lunch inc

VIC Thursday, 16 July
NSW Wednesday, 23 July

VIC Distribution & Training Centre
NSW LSC Branch

NEW

visit www.lsc.com.au/teched-training

This 7 hour course will cover the connection and configuration of Dahua CCTV cameras and Video Intercoms. It will run through the Dahua product range to enable you to select the best equipment for your next CCTV project. It will also cover the smart features built into the 4 and 5 series Network Video Recorders. It's a perfect introduction to CCTV for new installers!

This course follows the entry level Dahua DHSA (Dahua Certified Security Associate) courses DHCA-IPVSS (IP Video Surveillance System) & DHCA-VIS (Video Intercom System)

The course is run face-to-face by Dahua trained LSC staff, using a combination of presentation and practical learning on the latest Dahua equipment.

Learning outcomes:

- Understand the range of Dahua CCTV cameras, intercoms and recorders
- Learn how to connect and configure Dahua products and view recorded images
- Gain an understanding of phone App setup
- Setup a Dahua video intercom system

Prerequisites:

- Once enrolled using the form below, we will send you instructions to create a Dahua partner account so you can complete the course quizzes
- Bring your own Windows based laptop computer with administrator privileges

Morning tea and lunch provided. Receive a digital badge and certificate from Dahua on completion.

TRAINING THE TRAINERS: TECHED SESSIONS STRENGTHEN LOCKSMITHING EDUCATION

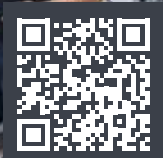

Last month, we held two sessions of the ADP202 Transponders and Diagnostic Key Programming course over two days at LSC's National Distribution & Training Centre. This course covers a range of manufacturers and, using vehicle simulators and specialised tools, teaches participants about immobiliser configurations, transponder preparation, and programming techniques.

On one of the days, we proudly welcomed three Security Technology – Locksmithing teachers from Melbourne Polytechnic to hone their skills on the latest transponder technology. These educators will go on to train apprentices from Victoria, Tasmania, South Australia, and the Northern Territory.

THE *CHANGING* WORLD OF A LOCKSMITH PART 1

The following article has been reprinted with permission from the Locksmith Ledger International . While it reflects insights from the American market, we believe its themes and takeaways are highly relevant to our industry here.

The question every locksmith should ask is “what business am I in?” More than 60 years ago, Theodore Levitt famously asserted that the railroad industry weakened, not because the necessity to move passengers or freight had declined, but because those who ran the railroads saw themselves in the railroad business rather than the transportation business.

Only a few years ago, the locksmith might have been described simply as a tradesperson who duplicated keys, installed and replaced door locks or got into an old safe that had a forgotten combination. All that’s history now, or is it?

Indeed, the bread and butter for a great many locksmiths is getting someone “in” as soon as possible. Lost car keys? Locked out of a home or business? The locksmith is there to help — night or day. However, the often-used word “evolution” has arrived in the locksmithing space, with technology and digital transformation at the forefront of the growth movement for the locksmith industry.

Physical security systems, touchless access and video surveillance are all part of the new world of the locksmith. So, the question remains:

What business are you in? Is it the security business? The access control business? Is it an all-encompassing locking-solutions business that provides for the new worlds and the old all in one?

It’s true that a locksmith can and does thrive purely doing the aspects of the business mentioned earlier – lock replacement, keying and emergency services for auto and safes, among others. What we’ll explore here are some areas of growth for the locksmith industry on strategies to build a locksmith business in these key ways:

- Shifting from door locks to access control
- Learning and training on security systems
- Scaling up and owning the entire building

Shifting to Access Control

For locksmiths who consider themselves to be in the business of providing access to buildings, the easiest and most logical step in the evolution of locksmithing is to embrace access control, because, in the simplest terms, access control starts with a door closing and latching properly.

Some locksmiths are akin to a security integrator already, while others never have implemented access control. One of the best ways to begin the journey into access control is through starter products that are easy to understand and simple to install. After you have a handle on those

“One of the best ways to begin the journey into access control is through starter products”

products, it will open more possibilities for advanced projects.

Many who are new to access control believe it might be difficult to cross over from mechanical to electronic security. In practice, however, it's the other way around. Pure access control technicians might have a more difficult time understanding and learning mechanical security than the locksmith, who already understands mechanical security, has in adapting to access control solutions.

The effect of the pandemic created another potential area of growth for the locksmith industry around health and safety concerns. The drive to add that extra layer of health security for employees and visitors has manifested in the installation of touchless and antimicrobial hardware in commercial buildings across the country.

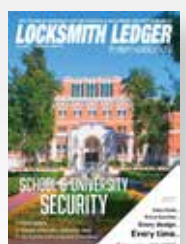

This is a trend the industry already experienced in a similar fashion. Twenty years ago, accessibility for people who had disabilities wasn't a foremost concern, but the Americans with Disabilities Act (ADA) [our equivalent is DDA] changed that in the same way the pandemic has affected the current choice of products. In the future, many of the health-related solutions that recently have been adopted will be the norm, and it's likely that most openings will continue to have features of health protection as well as security.

Key Takeaways

1. Get trained on access control solutions and learn the capabilities of products, so you can lead informed conversations with customers and offer the best options for their unique demands.
2. Starting small will help you prepare for more-advanced projects.
3. Focus on health-safety solutions and the ADA (DDA) analogy as a conversation starter with customers to find touchless and antimicrobial hardware opportunities. For example, you might tell your customer, “Just like the ADA (DDA) changed how we provided accessibility for people who have disabilities, access control will include health-related solutions for customers now and in the future. Is your company working to incorporate safety solutions through products, such as antimicrobial hardware, low-touch hardware and touchless access?”

Tune in next time for part 2

New McGrath Locks Consumer Website Now Live

Helping end users choose with confidence and connect with you.

mcgrathlocks.com.au

We're excited to share that McGrath Locks has launched a brand-new consumer-focused website. Designed to support your customers and grow brand awareness, the new site makes it easier than ever for end users to explore the full McGrath Locks range, understand key features, and connect with trusted professionals like you.

Check it out!

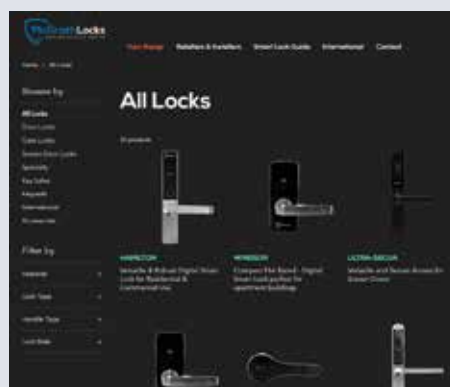

Consumer-Friendly Product Pages

The new website is tailored to homeowners and end users, with easy-to-understand product descriptions, guides, and helpful features. It's designed to reduce confusion and make it easier for your customers to choose the right lock.

Full McGrath Locks Product Range

From smart locks to mechanical solutions, the website showcases the complete, up-to-date McGrath Locks range—so customers can explore all the options available before speaking to a trade professional.

Connect with a Local Retailer or Installer

The built-in "Find a Reseller" tool allows visitors to locate their nearest trusted McGrath Locks retailer or installer. It's a great way to help drive leads to your business and grow local visibility.

ULTIMATE SCREEN DOOR LOCK

The Austral Ultimate lockset includes a Caretaker one-way locking function that enables the lock to be "snib locked" from the outside by operation of a Caretaker key. The Caretaker key cannot be operated to unlock the lock.

- Mortice hinged security door lock
- Pivoting parrot-beak bolt
- Latchbolt is retracted by either outside or inside lever
- Self-latching bolt
- Slotted strike plate and bolt profile
- Snib and cylinder locking
- Snib will not override key
- Incorporates specialty euro style cylinder (not included)
- Body measures 177 mm x 31 mm
- Handle length 110.7 mm
- Reversible
- Unique Caretaker feature
- Optionally use with HD16 triple lock
- Finished in black, brown, white & primrose

Yarrabilba State Secondary College: Smart Access Control for a Modern School

Yarrabilba State Secondary College is a new, progressive school in Logan City, Queensland. Since opening in 2020 with 250 students and 50 staff, it focuses on outdoor and project-based learning with hands-on activities beyond the classroom.

01 The Challenge

At launch, the college used traditional locks and keys, but this didn't fit the busy school day.

Teachers juggled multiple keys - up to seven - along with laptops and materials, making it inconvenient and costly when keys were lost or staff changed.

Security was also a concern, as the school needed to provide controlled after-hours access to community users without risking student and staff safety.

02 The Solution

To solve these issues, Yarrabilba adopted the Salto Space smart access system. Programmable keycards and wristbands grant staff access by role and limit external users to specific facilities and times.

Cards and fobs can be quickly issued, updated, or deactivated—lost credentials are instantly disabled without changing locks. New fob is fast, inexpensive, and handled in-house.

The same credentials also handle printing and scanning, reducing the need for multiple IDs. Salto's audit trail lets leadership track access, enhancing safety and transparency.

03 Key Benefits

Ease of Use

Teachers tap a wristband or card—perfect for busy hands.

Convenience

One card or fob replaces bulky keys.

Multi-Functionality

Credentials work for doors, printing, and more.

Low Maintenance

Lost fobs are easily deactivated and replaced—no locksmith needed.

Improved Security

Only authorized users access areas, with full access tracking

Support for Community Use

External groups use facilities securely after hours without risk.

LOX LOCKING - TRUSTED BY SECURITY PROFESSIONALS

LOX
LOCKING

From single sites to multi-site rollouts, LOX delivers reliable, professional results!

When it comes to securing people, property, and assets, professionals trust LOX Locking.

ABUS APAC VISIT OPENS DOORS ACROSS AUSTRALIA

We recently hosted a two-week visit from our ABUS APAC Regional Manager, Matthew Wise, providing a valuable opportunity for deeper engagement with our team, customers, and market. His trip began in Sydney with product information sessions and customer meetings, followed by a similar schedule in Brisbane. He then spent a week in Victoria, where he participated in product sessions, customer visits and lunch-and-learn sessions with staff, gaining a comprehensive view of our local operations and the locking systems used in Australia. The visit also gave us an exciting look at some of the new and upcoming ABUS products on the horizon.

EURO AND OVAL CYLINDERS
