ADVANCED DIAGNOSTICS ADD-ON SOLUTIONS

**ADVANCED
DIAGNOSTICS**

Check LSC website for all available cables & emulators

Advanced Diagnostics have a range of add-on solutions to facilitate key programming when all keys lost on select vehicles. This range of bypass cables and emulators also allow for key programming where vehicle

manufacturer security does not allow for conventional OBD programming. These solutions provide for a safe, secure and easy to use approach negating the need for component removal or spiking wiring looms.

SUPPORTING OUR PARTNERS *AT SECURITY 2025*

 27 - 29 August 2025

 Parkside 1, Level 2, ICC Sydney

LSC will be partnering with our trusted supply partners at this year's Security Expo, we're proud to support our trusted supply partners: Dahua, dormakaba, and HID, who will be showcasing their latest innovations at the event.

For over 30 years, this Expo has been Australia's leading platform for security professionals to explore the newest technologies, share insights, and find solutions to modern security challenges.

If you're attending, don't miss the chance to connect with these industry leaders and experience firsthand the products shaping the future of security.

Dahua Technology is a world-leading video-centric smart IoT solution and service provider. Based on technological innovations, committed to the mission of "Enabling a safer society and smarter living", Dahua Technology will adhere to its core value of "customer-centred", in order to provide the market with excellent quality and service, to create more value for customers, and make unremitting efforts to build a safe, intelligent, convenient and efficient society.

STAND Q6

dormakaba 

dormakaba has been serving customers in Australia and New Zealand for over 50 years, offering a comprehensive portfolio of innovative access solutions tailored to the unique needs of local industries. Their product range includes advanced access control systems, locks, master key systems, automatic do ors, digital door locks, and a full suite of door hardware.

They are there when you need innovative, reliable access and security solutions – in hotels, shops, sporting venues, airports, hospitals, in the home or at the office.

STAND T38

HID

HID powers the trusted identities of the world's people, places and things. HID make it possible for people to transact safely, work productively, and travel freely.

People use HID products to open doors, access digital networks, personalise badges, verify transactions, find information, track assets and connect with others—ensuring their identities are seamlessly accepted, anywhere, anytime. With HID's trusted identity solutions, people get effortless and worry-free identity verification experiences—with only a tap, twist, tag, push, swipe, or simply through the proximity of their chosen device.

STAND Q38

THE *CHANGING* WORLD OF A LOCKSMITH PART 2

THE TECHNICAL RESOURCE FOR THE PHYSICAL & ELECTRONIC SECURITY SPECIALIST
LOCKSMITH LEDGER
International

The question every locksmith should ask is “what business am I in?”

A day in the life of a locksmith can range from something as simple as cutting a key all the way up to installing access control and cameras. Clearly, elements of locksmithing and security go hand in hand, and both have overlapped and evolved in many ways over the years. But large integrators aren't the only ones that can install systems that include access control or video surveillance. There are growth opportunities for locksmiths in the installation of connected devices.

Locksmiths who educate themselves on connected devices are getting the business. Obviously, mechanical devices never will go away, but the electromechanical side is growing, and locksmiths have to seek out educational opportunities from training sessions — on-site and virtually. And with the immense numbers of offerings available, this creates a demand for product introductions from suppliers, so locksmiths can deliver the right solutions to their customers.

One example of a new opportunity would be when a customer reaches out for guidance on what's required for touchless access control. Walk the job with your customer and identify solutions at different prices for touchless actuators. Then, talk to your distributor to find products that are simple and reasonably priced.

After you place an order, request training at your shop, and when the installation date is scheduled, have some hands-on assistance for the first install and programming to prepare yourself for subsequent ones. After that, you'll be comfortable and confident to bid these jobs.

For those who are new to electronic solutions, the first step is to embrace low-voltage products, such as low-energy operators. After you learn them and become licensed, if required in certain states, you'll open your business to more opportunities. A good supplier partner not only will offer multiple trainings during the year, but they also will introduce vendors and products to help you to become comfortable with the offerings and products that might be new to you.

KEY TAKEAWAYS

1. Educate yourself and get training on new products and offerings. If you believe you might miss out on business during training sessions, notify your customers via voicemail or email that you're engaged in training so you can better serve them in the future.
2. After you learn a new product installation, you'll be comfortable bidding on jobs that will increase your sales and grow your business.
3. Embrace low-voltage products.

SPOTLIGHT

Instant Communication

with Push-to-Talk from the RisControl Keypad

RISCO's latest innovation brings added convenience and control to your smart security setup. The new Push-To-Talk feature allows real-time two-way audio between the RisControl touchscreen keypad and the RISCO Video Doorbell — all without needing to reach for your phone.

With this new feature now integrated directly into the RisControl smart touchscreen panel, you can see who's at your door and respond instantly, whether it's a delivery, a guest, or an unexpected visitor. This seamless in-panel communication enhances user experience, reduces dependency on mobile devices, and keeps everything centralised within your home security system.

Key Benefits:

- Instant voice communication with doorbell visitors via RisControl
- No phone or app required – ideal for quick responses while at home
- Clear, two-way audio for real-time conversations
- Improved accessibility and convenience for all household members

RVDBA701009A

Note: RisControl Keypad and Video Doorbell must be running the latest firmware version.
RisControl 1.8.0 (05/03/2025)
RisControl + SmartHome V1.8.0; V2.6.0 (05/03/2025)
Video Doorbell 4.4.0.47 (26/1/2025)

Austral Lock
BY GAINSBOROUGH

OVER 40 YEARS OF TRUSTED AUSTRALIAN MANUFACTURING

Austral Lock is a part of over 40 Years of trusted Australian manufacturing based in Brooklyn, Victoria, Austral Lock is a part of Allegion, the global leader in hardware and security. With over 40 years of local manufacturing experience and access to world-class technologies and resources, Austral Lock offers a wide range of products with a strong focus on function and a reputation for reliability.

From locking solutions for windows to security screen doors and sliding patio doors, Austral Lock combines design excellence with a rigorous approach to quality.

In mid-July LSC staff had the opportunity to tour the Austral Lock site, located just around the corner from our own Distribution & Training Centre. It was a fantastic opportunity to meet the passionate team behind Austral Lock who continue to champion local innovation, craftsmanship, and quality.

LGA TRADE DAY | TOWNSVILLE

LSC recently took part in a one-day trade event in Townsville, QLD, supporting the Locksmiths Guild of Australia (LGA). This event allowed us to connect with locksmith professionals from Northern Queensland and showcase our commitment to innovation and quality. We engaged with attendees, exchanged technical knowledge, and presented our latest products from ABUS, BRAVA, Borg Locks and McGrath Locks.

They also learned about our TechEd training program, designed to keep professionals updated on technology and best practices.

Thank you to the LGA for another well-organised event.

ASSA ABLOY

New &

IMPROVED

ASSA ABLOY ES8100 V-Lock

Engineered and assembled in Australia, the ES8100 is a powerful upgrade to the ES8000, with a 100kg preload rating, IP53 protection, enhanced door misalignment tolerance (12mm), door position monitoring, and LED lock status indicators.

Despite a complete internal redesign, it retains the same footprint for direct retrofit installs. The V-Lock's motorised bolt and V-shaped strike plate ensure secure alignment, whether mounted vertically or horizontally (excluding floor).

Available in surface or mortice mount options, the slim, stainless steel faceplate delivers both durability and modern aesthetics.

A smarter, stronger, and simpler locking solution.

KEY FEATURES

Unlocks under a Pre-Load of up to 100kg in 3-wire mode, 15kg in 2-wire mode

Locks under a Pre-Load of 20kg (12W) and 35kg (24W)

1000kg Holding Force

IP53 rated for external door applications

On-Board visual Lock Status indication and diagnostics LED
