NEW Stafford from McGrath Smart Locks

ABUS KeyGarage™

ABUS KeyGarage™ KG787
SMART - Bluetooth Wall
Mounted DP (BOX)
KG787BTC

ABUS KeyGarage™ One

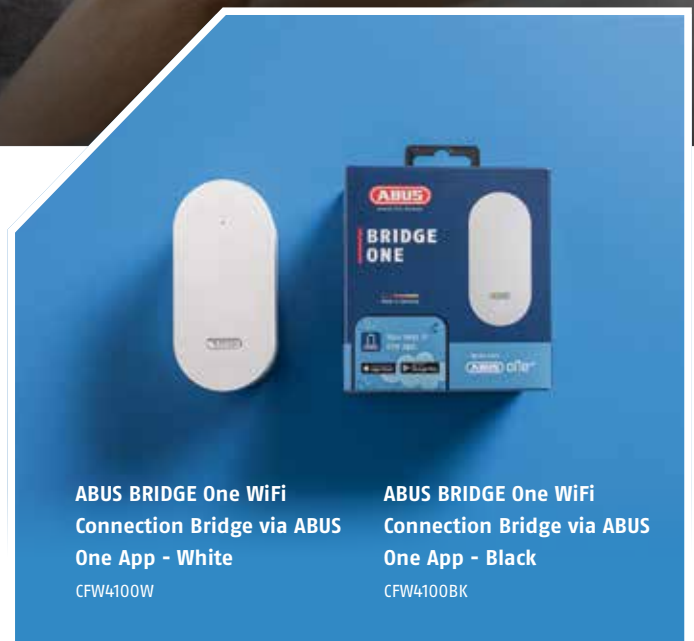

The ABUS KG787 Smart Bluetooth KeyGarage™ has had a face lift.

Still listed as the same part number (KG787BTC), the new-and-improved product is now renamed the ABUS KeyGarage™ One. The app has also had an upgrade. The old HomeTec Pro app is phasing out & you can now use the ABUS One app. The ABUS One app is super easy, intuitive & simple to use.

Also coming very soon, is the new ABUS Bridge One (WiFi bridge). BRIDGE One connects your ABUS One devices to your Wi-Fi network and to the internet.

With the BRIDGE One extension, you can open your smart key box from anywhere using the app or manage temporary or unlimited access rights in real time and revoke them if necessary.

ABUS Bridge One available in white or Black (coming soon)

2025 | 1st Finalist

Jack Jones

MGB Locksmiths | Melbourne, Victoria

Please provide a short personal biography about yourself?

While in high school, I read an article about skills shortages in Australia. I had always been interested in pursuing a trade, and when I saw locksmithing listed as an in-demand profession, it sparked my interest and motivated me to explore a career in the field.

I was fortunate to land a job at a small business with a rich history in locksmithing. I started out in the workshop as part of a close-knit team of about four people. It was a fun, supportive environment where we all got along well. I had the opportunity to work alongside experienced locksmiths whom I looked up to, and their guidance and passion for the trade inspired me to continue my journey in locksmithing.

What are some of the skills and abilities necessary for someone to succeed as a locksmith?

Customer service is our mantra at MGB Locksmiths, and I believe it's the key to success in this trade. Every day, we work with people who have families, responsibilities, and lives beyond the immediate issue we're helping them with. It's essential to keep that in mind.

As locksmiths, it's our duty to ensure the safety and security of these people and their property. Any locksmith can be technically skilled, but it takes a truly great locksmith to combine those skills with empathy, integrity, and genuine care for the people we serve.

What key issues do you think will affect the locksmith industry in the coming decade and how do you think these should be approached?

There are two main issues facing the locksmithing industry. The first is the growing problem of fake or unqualified locksmiths. The Master Locksmiths Association (MLA) has recently launched a strong campaign to raise awareness in the media and educate the public about the dangers of using unlicensed and unskilled locksmith. This issue has been present throughout my time in the industry, so it's fantastic to finally see real action being taken to protect both the profession and the community.

The other major issue is the rapid growth of electronic security, which will only continue to evolve over the next decade. As a predominantly old-school, mechanical locksmith, I've had to adapt by learning more about electronic systems and I continue to do so. Staying up to date with this technology is essential, not only for my own growth but to ensure our trade remains relevant and respected well into the future.

Tell us why you should be Australia's best young locksmith?

I like to think I represent what a locksmith should be. I take pride in my work, especially when it comes to customer satisfaction and receiving positive feedback from clients. I still keep in touch with some of the people I went through trade school with, and we share the same passion for keeping our trade alive and relevant.

So many traditional trades have faded over time, but I don't want locksmithing to become one of them. About two years ago, I reconnected with a great mentor in the industry, and now we work together every day. His guidance continues to inspire me, and fuels my commitment to making sure our trade stays respected, both within our field and across other industries.

UNLOCKING WHAT'S NEXT IN ACCESS CONTROL

**The physical access control industry is changing fast:
more global, digital, and complex than ever.**

So says industry leader, Lee Odess of The Access Control Collective, who LSC were proud to host last month. Lee joined us with a group of customers for a panel session exploring what the future of Security looks like.

Lee spoke about how smart, cloud-connected ecosystems are driving change in what clients want, and how big-tech is encroaching on our industry. We invited Lee in to show customers how they could grab a bigger slice of the pie than ever, and that opportunities are growing, and locksmiths and security installers are needed more than ever.

Ten years. One story... a century in the making.

Celebrating a decade of the dormakaba merger in Australia and New Zealand, and more than 160 years of global innovation.

On 1 September 2025, dormakaba celebrates a major milestone; ten years since the global merger of two industry pioneers, DORMA and Kaba.

But this anniversary is more than a birthday. It's a reflection of a story that began over 160 years ago with a small locksmith shop in Switzerland and a family business in Germany, that has since grown into one of the world's top three providers of access solutions.

From mechanical locks to mobile credentials, from local service teams to global innovations, dormakaba has helped shape the way the world moves through space. Today, the company operates in more than 130 countries, holds over 1,600 active patents, and employs more than 15,000 people worldwide, with over 1,000 of them proudly working across Australia and New Zealand.

“This anniversary is a celebration of the people and partnerships that have shaped our journey,”

“The dedication and expertise of our team, along with the ongoing support of valued partners like LSC, have been instrumental in our growth and success over the past decade. Together, we honour our shared achievements and look confidently to the future of access.”

Chris Goodall,
Managing Director, dormakaba Pacific.

**160 years of expertise. Ten years of unity.
One powerful future.**

Since DORMA and Kaba joined forces in 2015, dormakaba has led the charge in transforming the access industry, launching industry first cloud based access solutions, driving sustainability, and embracing innovation. Locally, dormakaba Australia & New Zealand is a trusted leader in premium door hardware, offering a comprehensive range across the region. From complete door kits and precision engineered mortice locks to

an extensive portfolio of door closers suited to every application and project type, our solutions are built for durability, safety, and seamless performance. Whether for commercial buildings, healthcare facilities, government projects, or large-scale infrastructure, dormakaba delivers hardware solutions that combine reliability, design flexibility, and ease of installation.

A journey marked by innovation

dormakaba's long-standing heritage is filled with breakthroughs that have shaped the global access industry. From the invention of the reversible key and pushbutton lock, to the first automatic door operators and world-first airport e-gates, the company has always been at the forefront of innovation and progress.

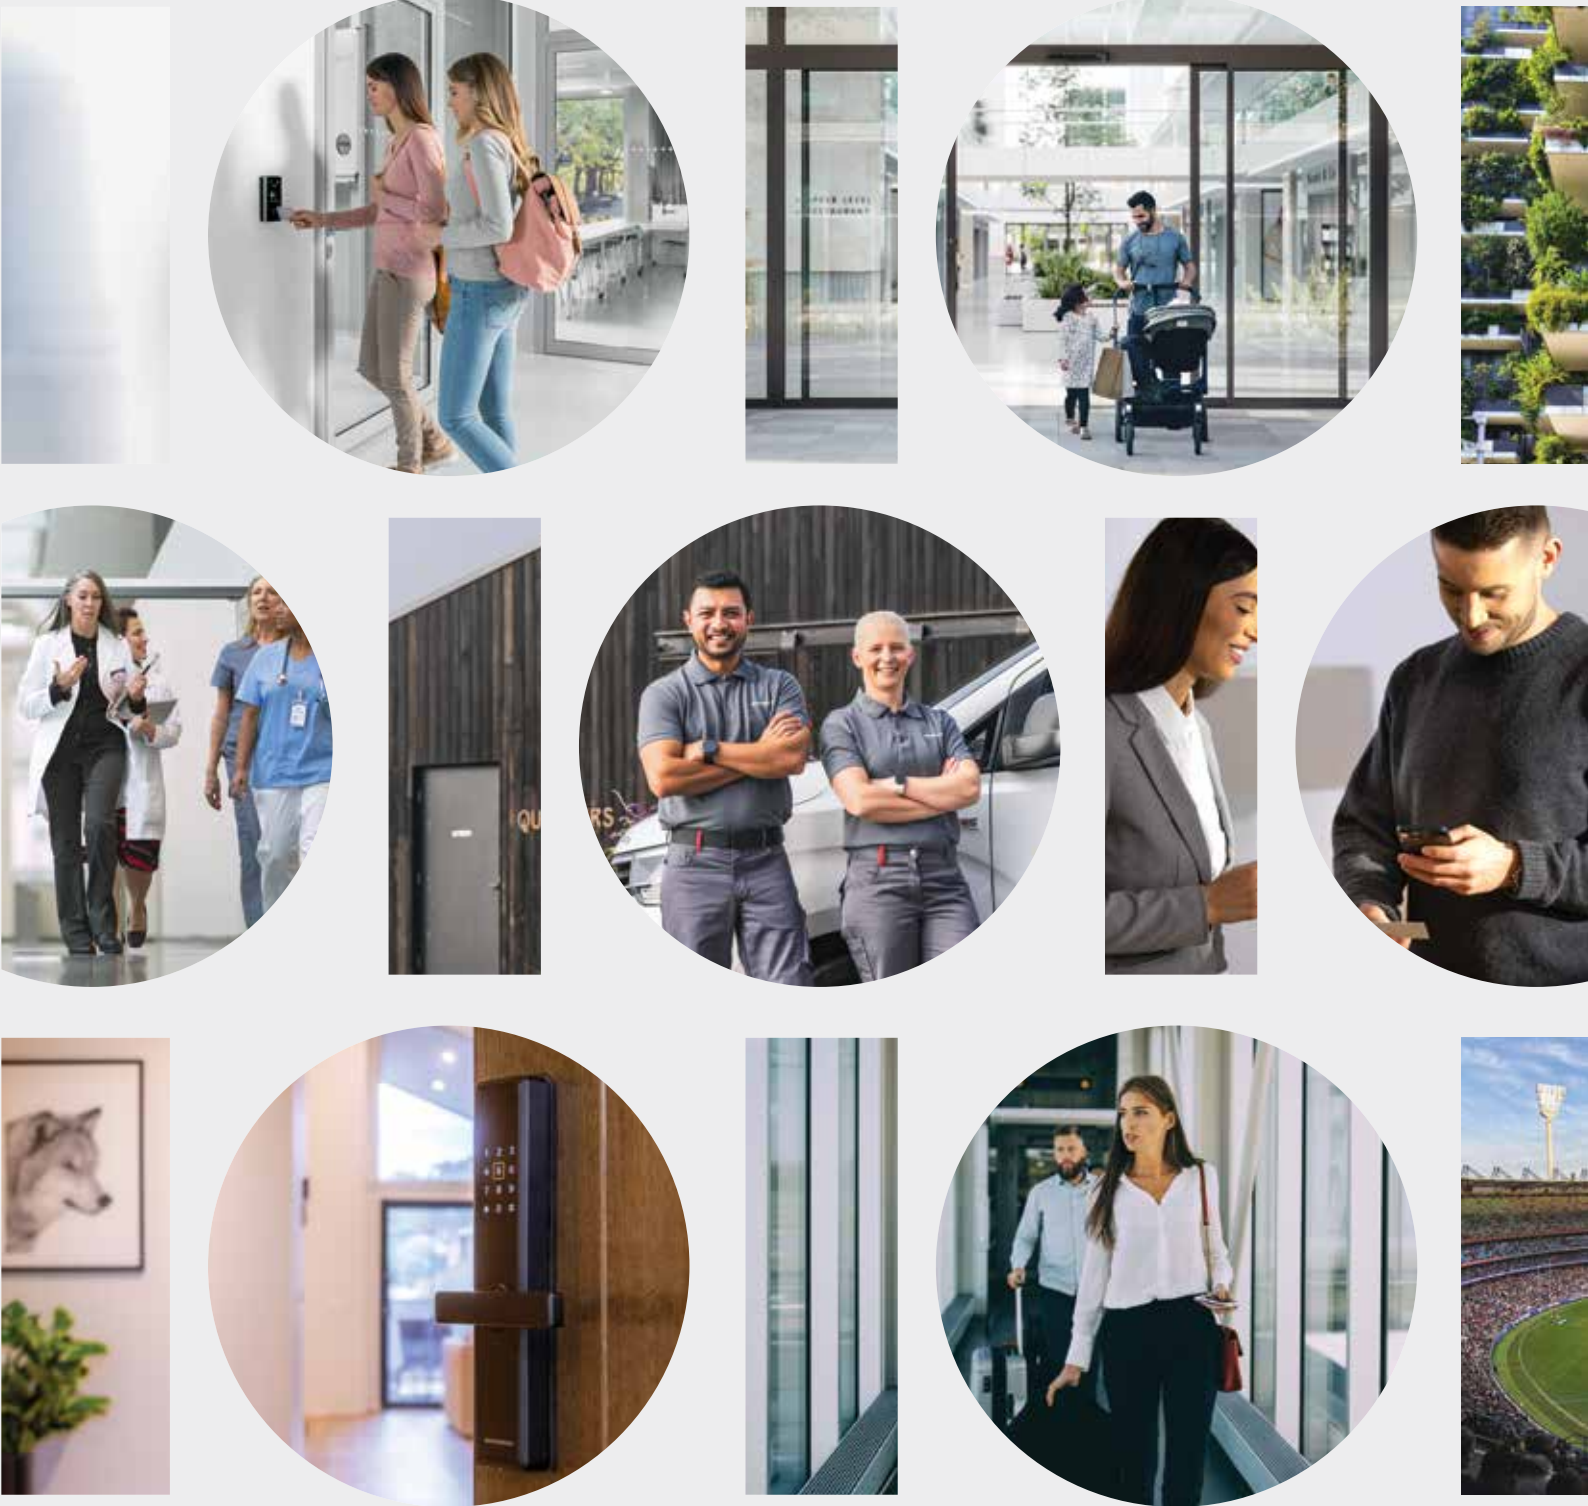

Celebrating the Future – Together

Under the global anniversary banner “Ten Years. One Story.”, dormakaba sites around the world are reflecting on their collective achievements. Here in Australia and New Zealand, celebrations are bringing together employees, partners, and the wider community to acknowledge what's been built – and what's still to come.

The next chapter will be written through continued collaboration, customer partnership, and the drive to create secure, seamless, and sustainable access solutions for a rapidly changing world.

Because at dormakaba, we don't just open doors
- we open possibilities.

LTI COMBI+ MANIPULATOR AND DIALLER

Combi+ is a fast, easy to use, tablet-controlled safe lock manipulator for opening Group 2 mechanical safe locks. This device combines both manipulator and dialling functionality.

SCAN TO LEARN MORE

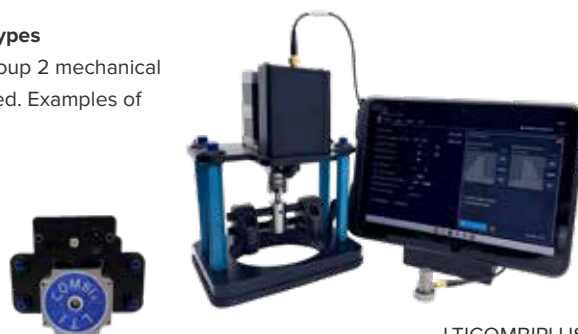

Tablet Included

The Combi+ is controlled via a tablet which connects through Bluetooth and USB. All settings and controls are managed in a powerful, easy to use app on the tablet. The Combi+ is configured through the app to set the contact points, select the dialling configuration and other user-defined parameters.

Compatible with Many Lock Types

Generally, all 3 and 4 wheel Group 2 mechanical combination locks are supported. Examples of supported locks include:

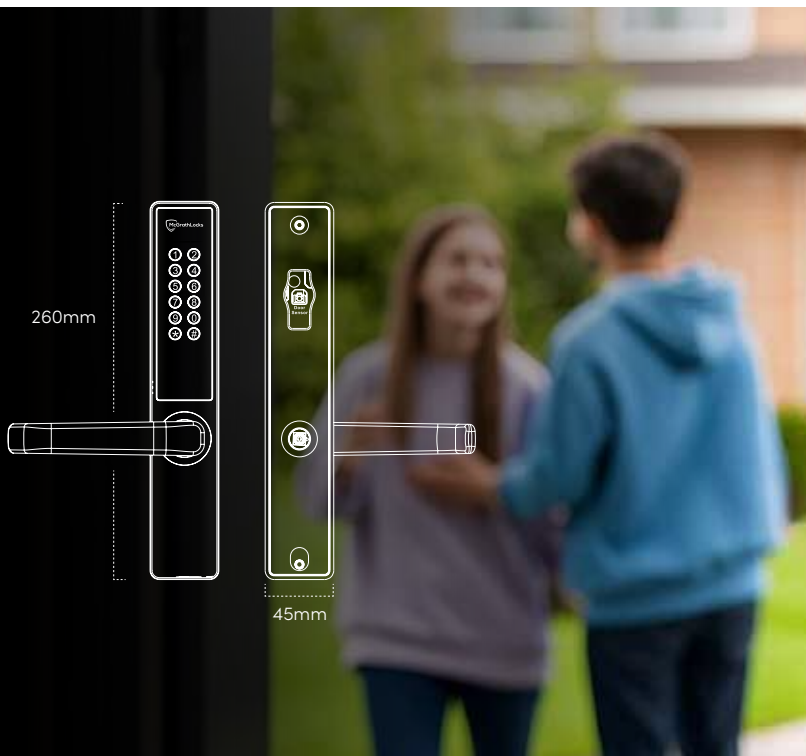

- S&G 6730
- S&G 6731
- S&G 6741
- LaGard 3330

LTI COMBIPLUS

STAFFORD Robust Commercial Digital Smart Lock

Durable 4-in-1 digital door lock ideal for homes, offices, or businesses.

The STAFFORD by McGrath Locks is a sleek and stylish lock designed and developed for the Australian market. Featuring a tempered glass screen with raised buttons, this 4 in 1 digital door lock provides a versatile and convenient method of entry that allows you to easily manage who has access to your property through the McGrath Locks App. Manufactured from fire resistant material, the Stafford is compliant with E-Core doors when fitted with the McGrath Adjustable latch and dormakaba MS2602, 2902 mortice locks.

Key Points:

- DDA Compliant lever design
- Rekeyable oval cylinder
- IP66 on outside handle
- Supplied with door sensor for door open monitoring
- Raised button design, no need to wake the screen before operating
- 2 hour fire rating with E-Core doors (Firecore testing pending)
- Locking compatibility includes, tubular latch, Euro Mortice, ANSI mortice and most Australian commercial mortice locks

SAVE TIME AND ELIMINATE FAULTS WITH THE FAST CONNECTOR SYSTEM

Strip, twist and insert, job done.

SCAN TO LEARN MORE

Jack Fuse FAST Connector System saves time and helps eliminate faults associated with traditional solder, crimp or screw terminal connection methods.

Suitable for solid or stranded conductors. Just strip the conductor and insert into the appropriate colour coded terminal.

The FAST Connector System can be quickly fitted in advance to security peripherals, thus saving costly on-site labour hours.

Applications:

- Quick connection of card reader tails to security cable
- Wiegand, RS485 & OSDP protocols
- Lock & power cable connections
- Access control systems
- Wiegand and RS485 code pads
- RS485 daisy chain and termination

Features:

- Secure quick connect spring clamp terminals
- Colour coded terminals
- Compact size to fit into wall cavities, duct and door frames
- No solder, crimps or screw terminals

TAFE STUDENTS GET HANDS-ON WITH MCGRATH SMART LOCKS

LSC recently partnered with NSW TAFE to give students a hands-on experience trialling the latest in Smart Lock technology. This initiative allowed future tradespeople to explore real-world applications of electronic access solutions and deepen their understanding of end-user needs.

During the trial, students were tasked with selecting and installing appropriate Smart Locks in line with Disability Discrimination Act (DDA) and Fire Safety standards. They also configured gateways and set up mobile applications used for Smart Lock management.

As part of the experience, students learned how to assist future end users with app registration and lock operation, while gaining valuable insight into maintenance and servicing best practices for long-term system performance.

This hands-on trial not only strengthened students' technical skills but also highlighted the importance of combining compliance, user experience, and practical know-how in the growing smart security space.

DAHUA CCTV TRAINING HITS THE MARK IN VIC & NSW

We recently hosted hands-on training sessions at our VIC and NSW branches, giving customers a practical introduction to Dahua IP Video Surveillance Systems (IPVSS) and Video Intercom Systems (VIS). Delivered by a certified Dahua trainer, the course combined presentations with real-world product setup, helping attendees gain confidence in selecting, connecting, and configuring CCTV cameras and video intercoms.

From exploring the latest Dahua 4 and 5 series Network Video Recorders to setting up the mobile app and video intercoms, the course was a great success—especially for those new to CCTV installations. Attendees walked away with enhanced product knowledge, a certificate of completion, and a digital Credly badge to showcase their skills.

Want to build your CCTV knowledge and hands-on skills?

Keep an eye out for upcoming sessions in your state or register your interest as spots fill fast!

in Memory of

PETER GREEN
"greenie"

LSC are deeply saddened to learn of the passing of our dear friend and esteemed colleague Peter Green.

"Greenie" was one of the founding members of LSC's Sydney branch, and helped get LSC up and running when we moved into Seville Street in Parramatta in 1988. It's said he had LSC blood in his veins! Often the first person customers saw, Greenie was a can-do bloke, nothing was a drama and he loved a good challenge. He was also up for a chat with customers, and could tell a great story or two.

He helped us move to newer premises in Silverwater, and was the face behind the counter or the voice over the phone for many years.

Twelve years ago he moved north, and took up a position in our Brisbane branch, bringing the same client focused, positive attitude and long industry and product knowledge to customers over the border.

More recently, he wanted to shorten his journey to work, having moved back to NSW (but only just), and was living in Tweed Heads. He joined Eric and the team at Border Locksmiths – enduring the (rather ridiculous) interstate border crossing daily during Covid, but really enjoyed seeing the industry 'from the other side'.

Well known, well remembered and loved by customers and colleagues alike we were much saddened to learn of his sudden passing on 19th July.

RIP.
