2025 | 2nd Finalist

Kyle Davey

SPL Security | Gold Coast, QLD

Please provide a short personal biography about yourself?

Hi, I am Kyle and I'm 24. I moved to the Gold Coast 9 years ago from Hobart. When I graduated school in 2019 I didn't know what I wanted to do until I can across a job advertisement for a locksmith on Seek.

I remembered messing around with locks and keys when I was a kid so I thought why not? It could be fun. So, I applied to almost a dozen different locksmith businesses on the Gold Coast to see if I could get an apprenticeship. After almost giving up hope, I got a call for a job interview at SPL Security. My resume had been passed along to them by TAFE for consideration for any future positions. I got the job in under a week.

3 1/2 years later, I finished my apprenticeship early and became a qualified locksmith.

What are some of the skills and abilities necessary for someone to succeed as a locksmith?

Attention to detail, a good work ethic, the willingness and determination to learn and improve upon your skills.

Anyone can be a good locksmith if they put their mind to it. It doesn't matter if you have trouble reading, aren't the best at maths or don't have the best ability or knowledge when it comes to tools, anyone can pick it up and learn the skills needed to be a great locksmith with training and determination.

but it takes a truly great locksmith to combine those skills with empathy, integrity, and genuine care for the people we serve.

What key issues do you think will affect the locksmith industry in the coming decade and how do you think these should be approached?

As time goes on, whether it be the next 10-20 years I believe that the industry will inevitably change and shift from the traditional locksmithing that we know well, and there will be less keys cut, cylinders pinned up, mechanical locks installed.

It may be hard for traditional locksmiths to adjust as more people choose electronic locks and digital keys operated by your mobile phone. Whether this will be a good or a bad thing for the industry as a whole, I don't know. But, we need constantly evolve as the technologies change.

As we have also seen recently. I think members of the general public will also begin to not trust locksmiths as a whole due to the actions of those people who call themselves "locksmiths" with the intention of doing wrong and scamming consumers. The MLAA, the Locksmiths Guild and the Government need to crack down on these people and come together to find a way to stop this as it gives the industry a bad name.

Tell us why you should be Australia's best young locksmith?

Do I think I am Australia's best young locksmith? No. I guarantee someone out there is better than me in one way or another when it comes to our abilities as locksmiths.

But, that doesn't mean that I'm not one of the best. My hands on skills might not be as refined as some others, but I've come a long way from not knowing how to use tools at all, to being a qualified locksmith. The skills I have learnt I am passing along to our next generation of apprentices as a Workshop Coordinator, as well as supplying our on road locksmiths with the parts they require for their jobs on a daily basis.

I am hard working and I think my drive and ambitions will be recognised by winning this award.

**ADVANCED
DIAGNOSTICS**

ADVANCED DIAGNOSTICS & SILCA UPDATE

A recent update to SMART Pro Nissan software (ADS2326) extends coverage to a number of late model 2020 – 2025. Where applicable in all keys lost situations the ADC2017 cable is required and connects directly to the vehicle BCM.

**Advanced Diagnostics SMART Pro Software
for Nissan Mitsubishi Renault**
SD756299AD

Coinciding with this software update is the release of 2 new proximity keys to suit late model Nissan.

The Silca Proximity Keys compatible with Nissan have a similar design to the original key and are supplied ready-to-programme by SMART Pro or similar. Silca automotive keys are packed in a plastic clamshell for

easy identification and hook display and offer a reliable and economic alternative to OEM.

- 2 button
- Proximity key
- NSN14 emergency key included
- Suit Juke Qashqai

**Silca Automotive Proximity Key for Nissan Juke Qashqai with 2 Buttons

FIND UNUSUAL KEYS QUICKLY AND EASILY

Find unusual keys quickly and easily via measurement with Silca's MyKeysPro.

Customers are reporting an uptick in unusual or rare dimple or track keys, but did you know you can search Silca's extensive online catalogue of keys (www.mykeyspro.com) by dimension for these?

Log into MyKeysPro, and navigate to 'Catalogue', then choose 'Residential Keys'.

On the left-hand panel, drop the 'type' down to be 'Dimple and Laser key' and press Apply.

Now you can open up 'Blade/Key Dimensions', and you can enter some dimensions. Sizes are in mm, and we recommend using a generous tolerance to start.

If you don't get a result, try broadening your tolerance. A tolerance of 0.2mm to 0.5mm is a good place to start.

And if you're regularly coming across new blanks – let us know!

NEW KEY BLANKS

Keys are at the heart of all good locksmith businesses, and Silca is the blood that keeps your business pumping.

Make sure you're ready to go with some of these new keys, added to the range over the last few months.

In particular, we've added keys to support the rapid growth of 'dimple' style keys with a simple "M-W" profile pattern. Silca blanks RC11, RC11R, RC14R, RC16R, RC17R, RC21R, RC22R, RC23R and RC24R apply. Check www.mykeyspro.com for the full details.

New ABUS High Security catalogue available!

The **ABUS Rock Series** just got better!

The new ABUS Rock Series has had a serious upgrade. In doing this ABUS can achieve a higher security rating to previous ABUS Rock models. Also ABUS have made the new models accept various cylinders, the 570 Oval, the

ABUS fig 8 core & a half Euro cylinder (10/30), making this a truly world wide product. Higher security & multiple cylinder options making it a class above the competition.

ABUS ROCK 83CS/70 & 83/70

- Lock body made of hardened steel with NANO PROTECT™ coating
- Hardened special steel shackle with NANO PROTECT™ coating for very high corrosion protection
- Double bolted locking mechanism increases the security of the lock
- Key retaining: locking only with key (when open, the key cannot be removed)
- Rekeyable: the cylinder can be exchanged and thus also adapted to existing bittings
- Closed Shackle version (CS): shackle guard makes access using forcing tools such as bolt cutters difficult
- Protected against drilling or pulling
- Optionally available with fully detachable shackle
- Australian Oval: accepts standard 570 Oval cylinders
- With adaptor "EPZ" version: accepts standard Euro profile half cylinders (10/30)
- With adaptor "Figure 8" version: accepts all cylinders from the ABUS 83 series
- 15mm dia shackle

MLAA CONFERENCE | EVENT WRAP UP

The biggest event on the locksmithing calendar in 2025 did not disappoint, with locksmiths from all over Australia and New Zealand flocking to Sydney for the MLAA National Conference & Trade Expo at the iconic Fullerton Hotel. This year's program included two action-packed days of learning, networking and trade expo where we showcased many innovative security solutions.

LSC we were delighted to unveil many exciting products including the McGrath Smart Locks range of digital locks, the dynamic ABUS retail display and an exclusive world-first preview of a new Silca machine that will arrive in Australia in 2026. These products fill needs in the Australian market and excitingly complement our existing product range, to truly help us to be a locksmith's one-stop-shop.

We were privileged to hear from keynote speaker Dave O'Toole, President of the European Locksmith Federation and Board Member of the Association of Locksmiths of America. With over 40 years in the locksmith industry, Dave has built and operated successful businesses in Dublin and Belfast. Dave shared valuable insights about global locksmithing trends, highlighting key risks and opportunities. He also discussed how the industry is evolving and what locksmiths can do to stay ahead in an increasingly digital landscape.

We congratulate Connor McColl from Norm Hyatt Locksmiths in QLD for winning the prestigious John Andrew Apprentice of the Year competition. Jointly sponsored by Silca, ABUS & LSC, Connor and his mentor will receive an all-expenses paid trip

We look forward to seeing you in Melbourne in 2026!

to the Silca factory in Veneto, Italy & ABUS' factory in Wetter, Germany.

It was great to bring along so many of our supplier friends, many of whom travelled internationally for the occasion. Industry experts from ABUS, Silca, McGrath Locks, SECURAM, WH-Software and Salto Systems were all in attendance. We certainly hope you enjoyed our complete range of Security Solutions that we showcased across our stands.

This event is always a privilege to reconnect with so many friends and associates within the industry; thank you for making this event such an enjoyable one! We look forward to seeing you in Melbourne in 2026!

DAHUA TECHNOLOGY *Wiz Sense*

WizSense is a series of advanced AI-powered products and solutions that use an independent AI chip and deep-learning algorithms. It accurately recognises humans and vehicles in

images, helping users focus on real targets. Designed with simplicity and inclusivity in mind, WizSense delivers intelligent functions, easy configuration, and broad compatibility.

SMD 4.0

The latest Smart Motion Detection (SMD) technology brings upgraded AI capabilities to filter out irrelevant objects in a scene. Using an enhanced deep-learning algorithm, SMD 4.0 effectively ignores small and large animals, reducing false alarms. It can also detect clothing and vehicle colours, providing valuable data for quick post-event searches.

Quick Pick

Quick Pick technology accelerates the process of identifying human or vehicle targets of interest. By integrating the intelligent functions of both cameras and recorders, Quick Pick uses AI algorithms to extract and compare clothing and vehicle colours, enabling fast, precise searches for relevant SMD events.

AI SSA (Scene Self-Adaption)

AI SSA technology leverages deep learning to intelligently analyse and identify multiple scene types, automatically adjusting settings to produce optimal image quality in each environment.

AI Coding (IP Solution)

As monitoring resolutions increase, maintaining high image quality while reducing storage costs is critical. WizSense AI Coding, based on Constant Bit Rate (CBR) technology, dynamically allocates bit rate to preserve clear target images while saving over 25% more storage compared with H.265.

HID SIGNO™ THE SIGNATURE LINE OF ACCESS CONTROL READERS FROM HID

The **HID Signo™** Mechanical Keypad Reader 40T provides a high-performance, reliable option for harsh environments and a broader choice of Signo reader technology, especially when there is a preference or specification for a traditional mechanical device.

Offering robust, positive user feedback, the Signo Mechanical Reader is ideal for use cases where cold and wet weather conditions require gloved hands or when users may have low visibility.

A perfect fit for door applications requiring a wall switch mount, the mobile-ready Signo Keypad Reader 40T supports an unparalleled range of different credential technologies in a variety of form factors including cards, fobs and mobile devices.

- Supports Seos, iCLASS SE®, iCLASS SR®, iCLASS®, MIFARE Classic, MIFARE DESFire EV1/EV2, Mobile Credentials powered by Seos (HID Mobile Access), HID Proximity®, Indala® Proximity, AWID Proximity, and EM Proximity.
- High Frequency Read Range: 4 – 10 cm
- Terminal Block connection
- Mobile Credential connectivity via NFC / Bluetooth
- Mounting: Suited to mount and cover single gang switch boxes with a slotted mounting plate for alternate back box spacing
- 3x4 Layout Keypad (Bit or buffered mode configurable)
- Dimensions: 80 x 122.5 x 24.5 mm
- Wiegand or RS485 Half Duplex (OSDP) configurable
- Configurable with HID Reader Manager App (iOS and Android)

ASSA ABLOY

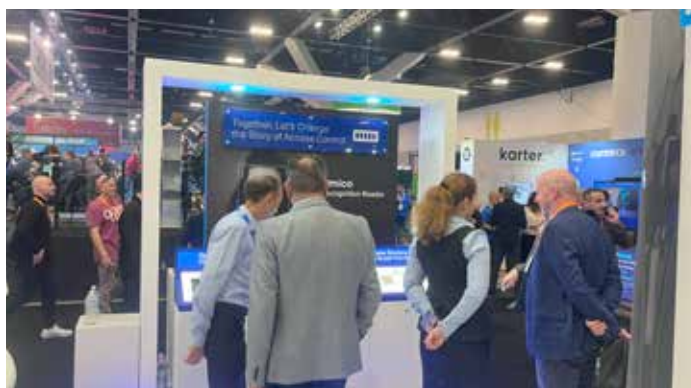

SECURITY EXPO 2025 EVENT WRAP UP

The **2025 Security Exhibition & Conference** has just wrapped up. This year's theme, "Securing the Future," brought together industry leaders from around the globe. Across 3 days, the Expo provided invaluable opportunities to explore the latest innovations, connect with peers, and engage in networking events. LSC was proud to attend in support of our trade partners who were exhibiting including HID, ASSA ABLOY, Dahua Technology and dormakaba. In addition, we were delighted to host Raising the Bar - our exclusive, invitation-only networking evening held in conjunction

with the Expo's opening night. Hosted at the elegant Champagne Bar, Sofitel Sydney Darling Harbour, the event welcomed around 80 VIPs, including leading security integrators, consultants, and locksmiths from across Australia. Guests enjoyed an evening of networking, drinks, and canapés in a relaxed yet premium setting. We were joined by our sponsors from HID, FSH, Enforcer Systems, RISCO and Salto who each had an opportunity to showcase their solutions and strengthen their relationship with our customers.

The Security Expo will be back at the ICC Sydney in 2026, save the date 2-4 September.

HAPPY CUSTOMERS

AMALGAMATED (QLD)

Jayde Coulthurst from Amalgamated Locksmiths in Brisbane are all smiles as they got a new addition to the workshop – a Silca Flash 008 machine.

SOLAR CITY (VIC)

Keegan Moylan is pictured with LSC State Manager, Brad Coward who helped introduce a sleek new retail display of McGrath Smart Locks in their showroom. This will give their customers a hands-on experience with the technology.

LOCKWOOD BRASS CORE RANGE

Proudly designed and assembled in Australia with Lockwood's trusted quality at its core, the Brass Core range now includes a large array of compliant lever styles that have been designed to integrate with the character of a building, providing aesthetic continuity throughout.

The Lockwood Brass Core Range introduces the largest collection of door handles to comply with Australian regulations for access and mobility. Breaking the paradigm that compliance opposes style, the Brass Core range merges purity of form with function, providing inclusive design to suit all aspects of architectural and user needs.
