LONG-LIFE DOOR TECHNOLOGY SOLUTIONS

Whether for private homes or contemporary office buildings, door closer systems from dormakaba are intelligent, integrated access solutions that combine consistency, convenience, design and premium quality.

see flyer for special pricing! ↗

TS68 EN2-4 Door Closer
DOTS6800SIL

The Dorma TS 68 door closer is particularly quick and easy to install. The closer arm's power shoe and changes in template position allow easy selection of the closing force to suit various door sizes. Further its minimal body projection when installed on the pull side enables doors to open to greater angles when close adjoining walls are a concern.

TS73 EN 1-4 Door Closer
DOTS7300SIL

Specifically for interior doors - also fire and smoke protection doors, the Dorma TS 73 proves to be the universal solution for doors of different design and construction. Due to the extremely flat, compact design, there are virtually no installation problems. Tried and trusted quality is your assurance of reliability.

TS83 EN3-6 Door Closer
DOTS8300SIL

Decades of experience have gone into the development of the Dorma TS 83 door closer. The result is user convenience coupled with outstanding versatility. It can be adjusted to suit almost all types of door. The Dorma TS 83 can even be supplied with additional anti-corrosion protection for exposed applications or aggressive conditions.

E-PLEX DIGITAL LOCK

The E-Plex range of digital locks has long been a favourite amongst installers and users alike, and for good reason. This robust range of locks has been designed to withstand heavy duty use, and is a popular choice for store room doors and busy pedestrian thoroughfares.

BRAVA Metro extra heavy duty double cylinder or single sided deadbolt. Solid steel tapered cylinder guard and interlocking bolt shield.

2021 | 4TH FINALIST

KENT FEGAN

TERRY'S LOCKSMITHS (QLD)

Please provide a short personal biography about yourself.

My name is Kent. I am 29 years old and grew up in the Gold Coast Hinterland. Since graduating high school in 2008, I followed in my father's footsteps and secured a job as an apprentice locksmith with his business, Terry's Locksmiths.

After obtaining my locksmith qualifications, I developed a love for automotive locksmithing and chose to specialise in this field. I have now been working as one of the most experienced automotive locksmiths on the Gold Coast and working for Terry's Locksmiths for the past 11.5 years.

In my spare time, I am kept busy with my young, active girls. I also enjoy spending time with my 4th child, my Harley Davidson Sportster, whenever I get a chance.

What do you most enjoy about your work as a locksmith?

What I enjoy most about my career working as a locksmith is:

- My job never actually feels like a job; I look forward to the day ahead
- Every day is different; no two jobs are alike
- There is always something new to learn as technology changes
- It offers exciting opportunities to develop and hone my skills where I recently got the chance to attend a TechEd course in Melbourne with LSC
- It challenges me daily to be a better version of myself
- It often requires me to think outside the box
- I enjoy being a mentor to my fellow peers

What key issues do you think will affect the locksmith industry in the coming decade and how do you think these should be approached?

Key issues that I think will affect the locksmith industry in the

coming decade are as follows:

- As technology advances in society, the industry will have to adapt its processes and equipment to keep up continually. Ensuring staff have the appropriate tools, training, equipment, and support to perform their jobs is essential.
- Smaller businesses are popping up offering similar services to a professional locksmith without licences, reputation, and level of expertise. We may not be able to prevent the pop-up of these companies in the future. However, we can focus on customer awareness by ensuring that customers know the value of using a reputable, reliable locksmith with the appropriate licences against those offering a lower price in exchange for lower quality work.

Tell us why you should be Australia's best young locksmith.

I think that I should be Australia's best young locksmith due to the following reasons:

- I am one of the most experienced locksmiths staying at the leading edge of the automotive field in Australia
- I am continually looking to upskill and to stay ahead of the curve in my field
- I am never too busy to offer a lending hand to my peers
- I have a love and passion for the locksmithing industry and remain committed to continually evolving as the industry adapts through time to ensure the industry we know and love stays relevant
- I am committed to promoting the importance that the locksmithing industry plays in society, most importantly, ensuring that individuals, families, and businesses feel safe and secure, which is the heart of the industry

If given the opportunity to be considered as Australia's best young locksmith, it will undoubtedly be a pivotal moment in my young career.

The SMART Pro Lithium Ion battery can be recharged hundreds of times before requiring replacement.

Typically, this means the battery has a life cycle of at least 2 - 3 years. It should be noted that lithium ion batteries continue to discharge when the device to which they are fitted is powered off. To prolong and preserve the battery please adhere to the the following points:

- Turn off Wi-Fi when not updating or programming a vehicle that requires internet access
- Reduce screen brightness in the settings menu
- Turn off the device when not in use
- Do not disassemble the battery
- Do replace the battery when no longer charging correctly
- Use only Advanced Diagnostic batteries & power supplies in order to avoid damage to your device

PRECISION GERMAN ENGINEERING

ABUS AirSecure Carbon Dioxide meter

CO2WM110

Monitoring Carbon Dioxide levels is an excellent way of checking air freshness and quality. The air quality inside rooms and buildings is becoming more important. Fresh air measurement is recognised as an excellent way to ensure ventilation. Buildings, offices, homes, units, home offices & more importantly, classrooms with good airflow are also safer for Covid-19.

ABUS now have a device to measure CO2 levels, and to provide visual and audio warnings alerting people to take steps to increase ventilation.

Scientific research recognises a build-up of CO2 can cause drowsiness, headaches, fatigue or loss of concentration – and today we know that build-up also indicates a lack of airflow which increases the risk of Covid-19.

Various state governments in Australia are talking about making CO2 monitoring recommended or mandatory in public spaces, offices & schools. Setting up the ABUS AirSecure takes seconds, it is portable, easy to use and is battery powered.

Features:

- Detects CO2 levels indoors
- Displays CO2, temperature, humidity, date and time
- Wall or stand-alone mounting
- NDIR CO2 sensor lifespan: max. 10 years
- OLED display (high picture quality)
- LED colour display of the current air quality
- Power supply: AC adapter | Input: AC 100~240V | Output: DC 5V/1A (Micro USB)
- Backup battery (Li-Ion 3.7V)
- Operating temperature: -10° to 40° C
- Humidity: 0% to 95% (non-condensing)
- Measurement range: CO2: 0 - 5,000 ppm
- Alarm protocol: 200 messages

UNOCODE F SERIES UPDATE

Silca continue to roll out enhancements for the Unocode F-Series, and many of these are based on your request, and the feedback from the hundreds of machine owners worldwide.

Automate your key cutting and engraving operation with Unocode F-Series and save time, reduce errors, speed up your processes, and free up your staff for more productive tasks.

The latest updates improve engraving, make the setup for engraving models easier, allow you to import and export engraving models and more.

Combine this with the latest version of ProMaster8, and you can now transmit and automated laser cut keys where the card or system requires it.

Talk to your Account Manager today.

SALTO KS secures new sporting franchise, Swisherr Hoops Academy

SALTO
inspiredaccess

The SALTO system was exactly what we needed”

“We use the SALTO KS solution to send members a digital key, straight to their phone. It makes access easy for the member, and at the same time keeps the venues secure.”

- David

To get started with SALTO KS, LSC can help you with pre-sales support to system implementation – just ask.

For aspiring basketball players in Tasmania, getting to shoot hoops isn't always easy. Hiring a whole court is expensive, and the number of shots you can take is limited by running to retrieve the ball.

David Bartlett, IT business owner, former politician and basketball enthusiast, realised this problem. Along with business partners Mark Nash and Anthony Stewart, former pro-basketballers, he saw an opportunity to bring something new to basketball - and Swisherr Hoops Academy was born.

Swisherr runs self-service basketball gyms called 'SHOTLABs'. Each SHOTLAB is a high-tech member only shooting room, complete with lighting, music, speakers and a ball return machine. The first SHOTLAB was fully booked from the moment it opened, and the network has grown to 10 SHOTLABs across Tasmania. With every new venue, Swisherr gains 50-100 new members.

Initially, each SHOTLAB had a keypad where members entered the code they had been sent. But this approach was not scalable or secure enough as Swisherr grew. "Codes sometimes got shared" explains David, "so we didn't have full control over access. It was workable for the first 25 or so members, but we soon found ourselves at 200, then 400. We knew we had to find a smarter access solution."

David's research led him to SALTO, and to their Tasmanian partner, Kaleb Lehman of Securatech. "The SALTO system was exactly what we needed", says David. "We use the SALTO KS solution to send members a digital key, straight to their phone. It makes access easy for the member, and at the same time keeps the venues secure."

The SALTO system is integrated with the Swisherr membership and booking app, and the process of sending out digital keys is fully automated.

"We've now got a 'cookie-cutter' approach to new venues", explains David. "We have three contractors - one for walls and lighting, one for floors and Kaleb for all the technology. It means that once we've identified a site and signed a lease, we can have a SHOTLAB up and running in a week. It's true to say that without the SALTO system, we simply wouldn't have had such a viable business, and definitely wouldn't have grown so fast."

REDBACK IP66 COMPACT ENCLOSURES

Looking for an IP66 enclosure? Look no further, Redback Racks by PSS Distributors weatherproof enclosures are designed to protect your equipment against rough weather conditions.

The range of enclosures are IP66 Rated. IP66 are rated as “dust tight” and protect your equipment against heavy seas or powerful jets of water.
