

2-Way Wireless Piccolo PIR/Pet

Model: RWX96P40200A

The Wireless Piccolo is a compact and stylish wireless PIR detector with a contemporary and clean design. An ideal solution for residential and small and medium commercial installations.

The convex lens shape provides enhanced catch performance and sensitivity, adding to the detector's reliability.

The Piccolo wireless detector has a coverage of up to 10m. The pet friendly model has a coverage of up to 8m and is suitable for pets of up to 36 kg.

The detector is designed for quick and easy installation and has a magnetic bracket for easy installation and battery replacement.

New Creep Zone in PIR version

The new 2-WAY PIR version incorporates an improved catch performance with a look down 'creep zone' that detects movement directly under the PIR detector and eliminates blind spots.
