

Key Programming Software update compatible with Mercedes* ADS2298

April 2023

Now with all keys lost coverage

Advanced Diagnostics is pleased to announce an update to the ADS2298 Mercedes* software to program new keys even without a working key.

What does the software do?

The software is designed to program slot keys compatible with Mercedes* models from 1996 to 2014. The software is automatically activated when the Smart Programmer ADC260, required for programming these keys, is connected to the Smart Pro. The cable kit ADC2600 is required to program new keys in the absence of a working key.

A maximum of 8 keys can be programmed with this solution - you don't have to delete existing keys to add new ones. The security password is calculated in the background by the server - the Smart Pro must be connected to the internet. The 3-button slot key by Silca HU106S23 is also available and features the same infrared technology used by original keys.

What else will I need?

Smart Pro

Smart Programmer
ADC260

Slot key
HU106S23

Cable kit ADC2600 (if no working key available)

Full support, including connection locations specific to each vehicle model, at mykeyspro.com under "Guided Processes".

OFFER DETAILS

Cable	ADC2000
Other accessories required	Smart Programmer ADC260 Cable kit ADC2600 (if no working key available)
Other software required	No
