ASSISTANCE

WITH UNMATCHED SAFETY AND RELIABILITY FEATURES, THE SAFETY CALL POINT RANGE SETS A NEW STANDARD FOR ALARM ACTIVATION BUTTONS

In a critical moment, the Safety Call Point is highly visible and easy to operate, thanks to integrated illumination and a large, clearly marked actuator. Instant LED and sounder activation helps guide responders and reassures users that the alarm has been successfully triggered.

Active monitoring continuously supervises operational status while the redundant output and buttons safeguard against failure. Remote reset capability and case tamper detection further enhance the SCP and help ensure the button will work when it matters most.

- ACTIVE FEEDBACK WHEN PRESSED
- REDUNDANT ACTIVATION SWITCHES
- REDUNDANT RELAY OUTPUT
- LARGE TACTILE ACTUATOR AND BACKLIT TEXT
- ACTIVE MONITORING FOR POWER FAIL & CABLE FAULT
- CASE AND WALL REMOVAL TAMPER ALARM
- REMOTE AND LOCAL RESET
- AUX OUTPUT FOR SEPARATE ALARM INDICATORS
- REMOVABLE ACCIDENTAL ACTIVATION GUARD
- ADJUSTABLE VOLUME AND LED BRIGHTNESS

➤ AUX OUTPUT FOR TWO LODESTAR ALARM INDICATORS
