

NEW KEYWIN GENERATION

Smart and simple.

Administrative tool for management of valuables and keys

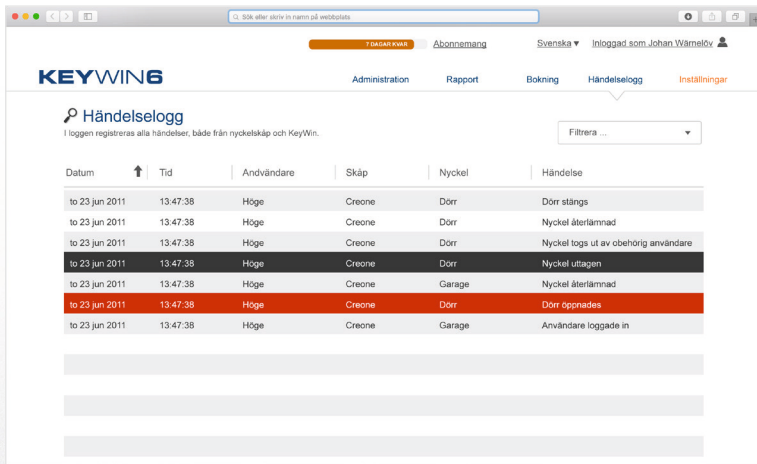

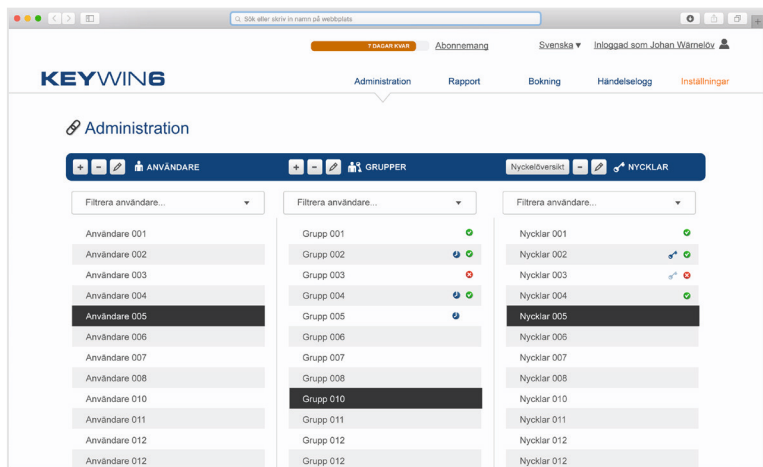

KEYWIN6 – now in the cloud.

Digital systematisation, monitoring and control.

Let us now show you the best possible way to administer your keys. We offer secure control and safe management, whether you handle a few – or a few thousand – keys.

Administration

A smart search function makes it easy to get a complete overview. Find the right user or key easily. Mark a key to see which users and groups are linked to that specific key, or mark the user or group to see which keys have been linked to it.

Event log

View all events in the log or choose the parts you need. The intelligent search function, with select and timeframe options, makes it easy for you to get the information or report you need.

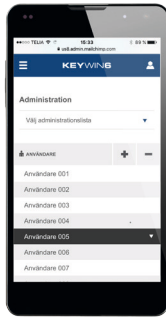

All alarms in the log are clearly indicated in red and give you clear information about what or who triggered the alarm.

Connect your value boxes

Connecting our Valuebox systems to KeyWin6 gives you additional control and more secure storage of your valuables. It enables you to check on keys and use as well as handling of valuables and equipment.

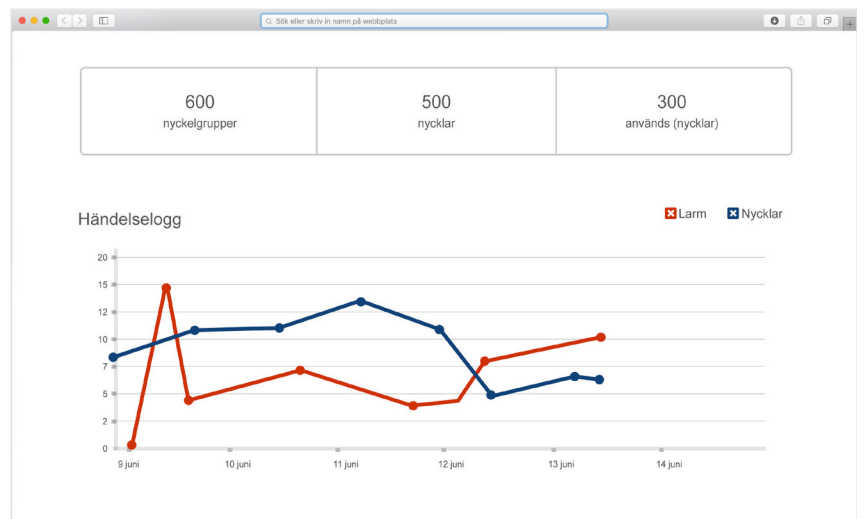

VALUEBOX

KeyWin6 is also available for mobile applications.

Reporting NEW

With our KeyWin6 reporting system, you can always keep track of your keys movements. Among other things, you can get a list of the most common alarms for each given period. You can easily view a list of the most frequent system users as well as of the most frequently used keys. The data is displayed in diagrams giving a clear overview of the use of the system.

Settings

You can use the settings to install a new system and add or remove administrators. In the tool you can also manage more advanced settings such as language settings, the number of valid characters in codes, backup and communication settings.

| Användare | Nyckel | Datum från - till | Tid från - till |
|-----------|------------|-------------------|-----------------|
| Albin | Nyckel 001 | 160212-160213 | 14.00-16.00 |
| Robin | Nyckel 002 | 160216-160220 | 08.00-16.00 |
| Johan | Nyckel 003 | 160211-160214 | 08.15-16.00 |
| Richard | Nyckel 004 | 160301-160305 | 08.30-13.30 |
| Borg | Nyckel 005 | 160311-160314 | 09.15-15.00 |
| Johnny | Nyckel 006 | 160312-160315 | 09.15-15.00 |
| Albin | Nyckel 001 | 160212-160213 | 14.00-16.00 |
| Robin | Nyckel 002 | 160216-160220 | 08.00-16.00 |
| Johan | Nyckel 003 | 160211-160214 | 08.15-16.00 |

Booking NEW

With the KeyWin6 key booking system, you can easily pre-book keys as well as valuables. You can always be sure that these will be available when you need them.

Hosting NEW

Our KeyWin web hosting service for your key management system has been developed in collaboration with Saab Combitech and offers the industry's highest level of IT security, along with seamless and intuitive functionality.

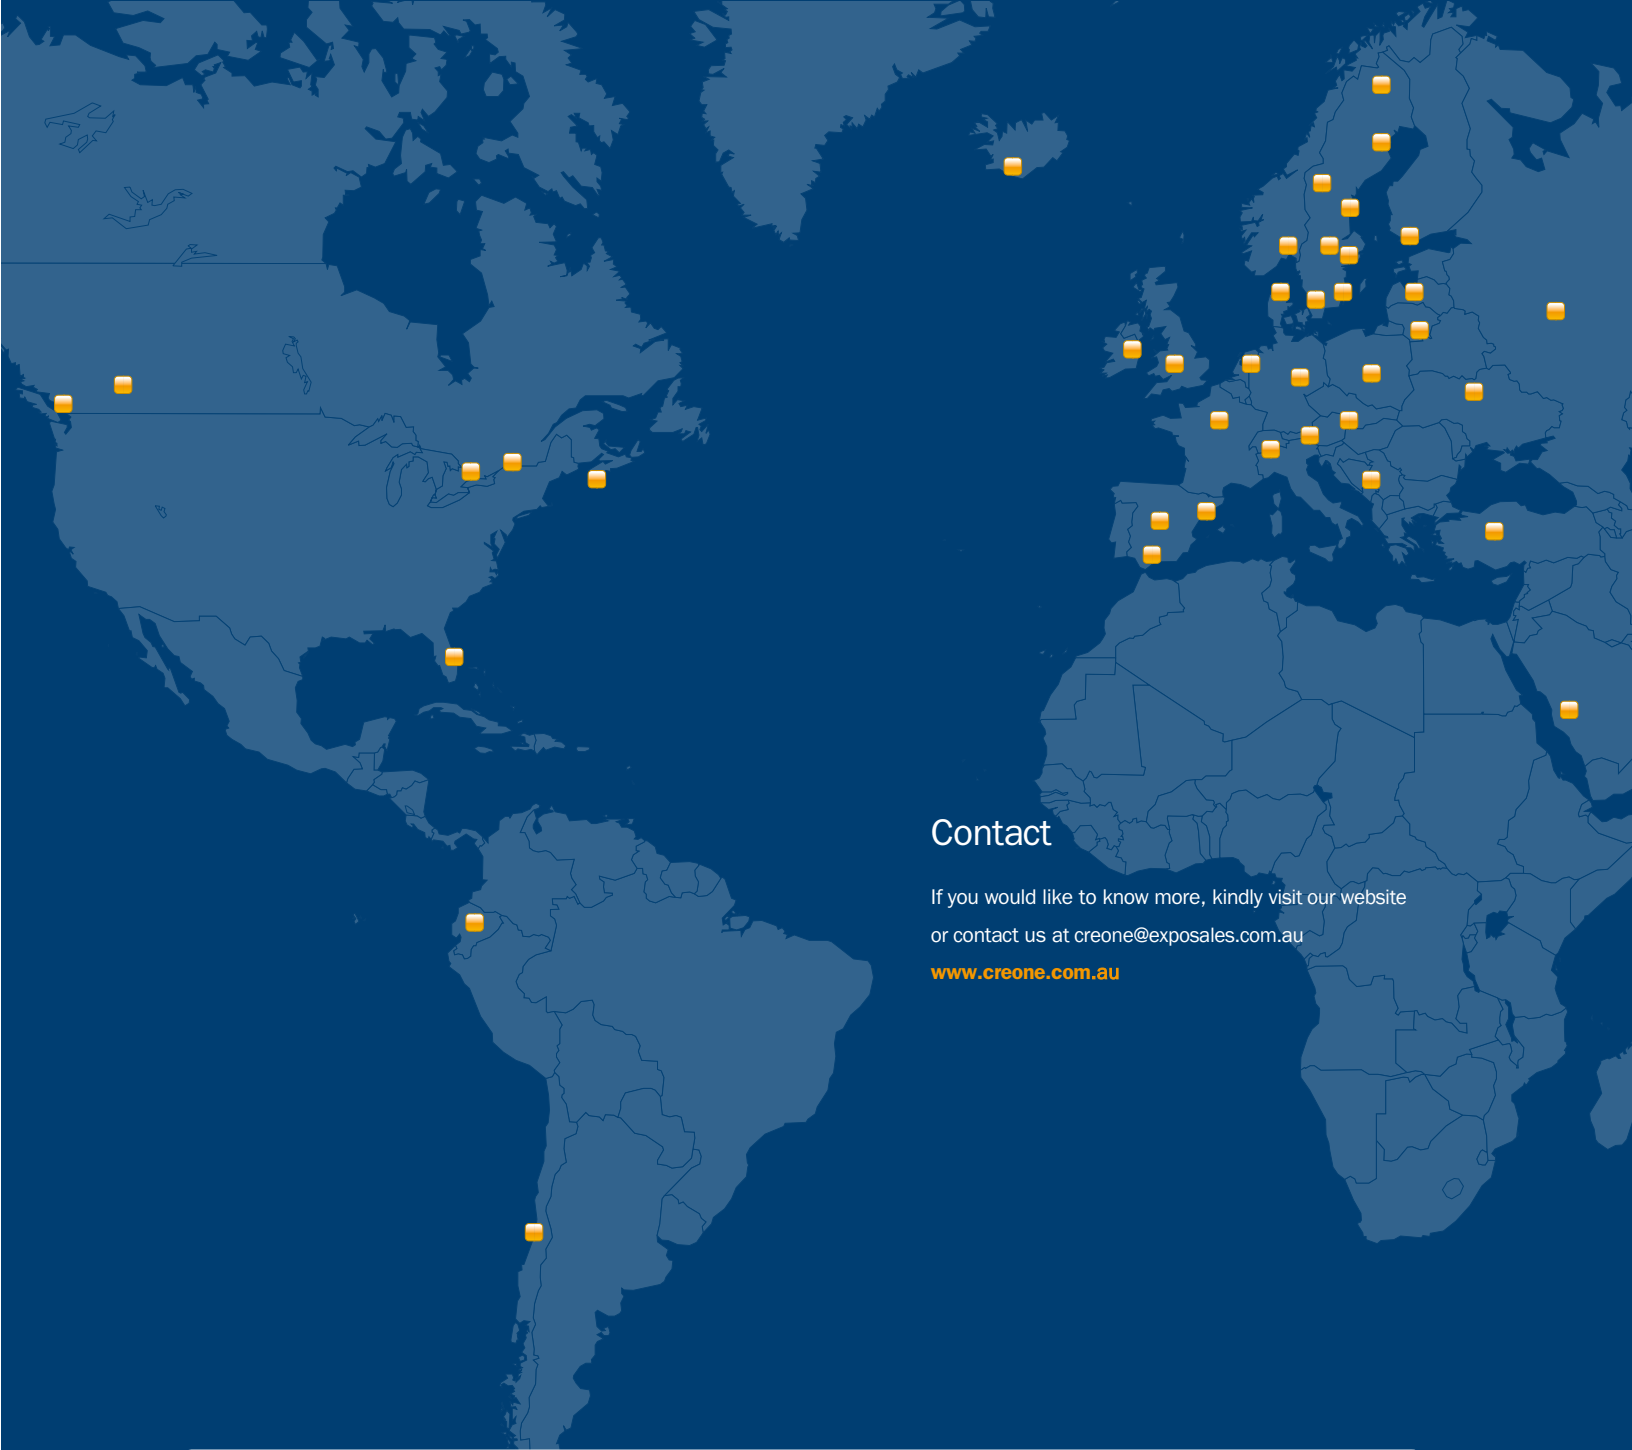

G4S Cash Solutions is one of three business areas within G4S Sweden that makes use of key cabinets from Creone. That's how you create secure cash handling for your customers every day.

Mikael Svensson of G4S explains more on [creone.com](https://www.creone.com).
