Keypads

Neptune offers a range of keypads to suit all applications. These versatile, cost effective keypads are a multi-function access controller, and include Reader mode, Single-door mode, Double-door mode, Interlock mode, and Demo mode (modes vary on different models).

The Keypads integrated readers can handle multiple card formats, fully potted electronics provide protection of IP65 to IP68 and Keypads can manage between 2000 and 20000 users.

Have an existing Access Control system?
No problems. Neptune keypads can connect to any system by Wiegand mode.

Power Supplies & Plug Packs

Neptune Power Supplies offer “great value for money”. They are supplied in a black metal case with key lock, AC power cord that plugs neatly into the side of the unit, battery charging connection, and on the 5AMP version, front mounted LED's to give easy reference for the state of the power supply.

Neptune Power Supplies are fully tested to meet Australian Standards.

Touchless Exit Buttons

Matt Black Touchless Buttons

Neptune Security Products have introduced a slick new range of Touchless Exit Buttons in Matt Black.

The new range is available in Mullion and ANSI style options, have a 500,000 tested mechanical life, 304 stainless steel and an LED indicator light:

Blue LED Indicator (Standby)
Green LED Indicator (Sensation)

IP65 Touchless Exit Buttons

In the current environment and the “new normal”, touchless solutions are becoming the preferred option.

In addition to the range of Matt Black buttons, Neptune Security Products have a range of IP65 Touchless Infrared Exit buttons

All the exit buttons have adjustable trigger state from 0.5- 30sec or toggle mode output and an LED indicator light - Red LED Indicator (Standby), Green LED Indicator (Action). Colours can also be reversed.

Glass Break Call Points

The Neptune re-settable call points feature LED illumination, an internal buzzer, and three NO/NC relay outputs.

This triple-pole call-point ('break glass' unit) benefits from state-illumination, the optional internal sounder on the event of trigger and a re-settable window with no breakable glass, meaning you don't need to replace the glass each time the call point is triggered.

Tools & Accessories

RJ45 Through Crimp Tool

NERJ45CPTOOL

Neptune Security Products has released a new RJ45 Through Crimp Tool. This versatile modular crimping tool is used with the Neptune NECAT5E6CP100, NECAT5ECP100, NECAT6CP100 through crimp connectors. It will save you time and money while ensuring your RJ45 connections perform.

RJ45 Crimp Connectors

Features:

- Crimps and cuts through crimp connectors in one action
- Leaves a clean, flush trim finish on the connector termination
- Ratchet mechanism requires less hand force
- Perfect solution for Cat5e/6 solid or stranded cables
- Strips and cuts round cables

SD Cards & SIM Cards

SD Cards

Neptune microSD Cards are high-performance controller built on SD 6.x standards, supporting SDHC and SDXC for use in 4K video devices, smartphones, and embedded systems. With advanced security, high-speed NAND interfaces (ONFI 2.x and Toggle), and a configurable BCH ECC engine, it delivers fast, reliable, and flexible performance for mainstream products.

Features

- Supports SDHC/SDXC
- SDA compliant (ver. 1.01-6.1), SD protocol compatible
- UHS-I U1/U3, Video Speed V6/V10/V30/V60, SDHC 2/4/6/10
- Application Performance: A1 (1500/500 IOPS), A2 (4K/2K IOPS)
- Supports MLC/TLC/3D NAND with BCH ECC error correction
- Operates at 2.7-3.6V with LVS, no external voltage needed; suited for portable & embedded storage

128GB Micro SD Card

NEMSD128G

NEMSD256G

SIM Cards

Our Machine-to-Machine (M2M) SIM cards are built for reliable, secure, and scalable connectivity across IoT, security, remote monitoring, and industrial automation applications. With flexible data plans and robust multi-network support, they ensure consistent performance in even the most demanding environments.

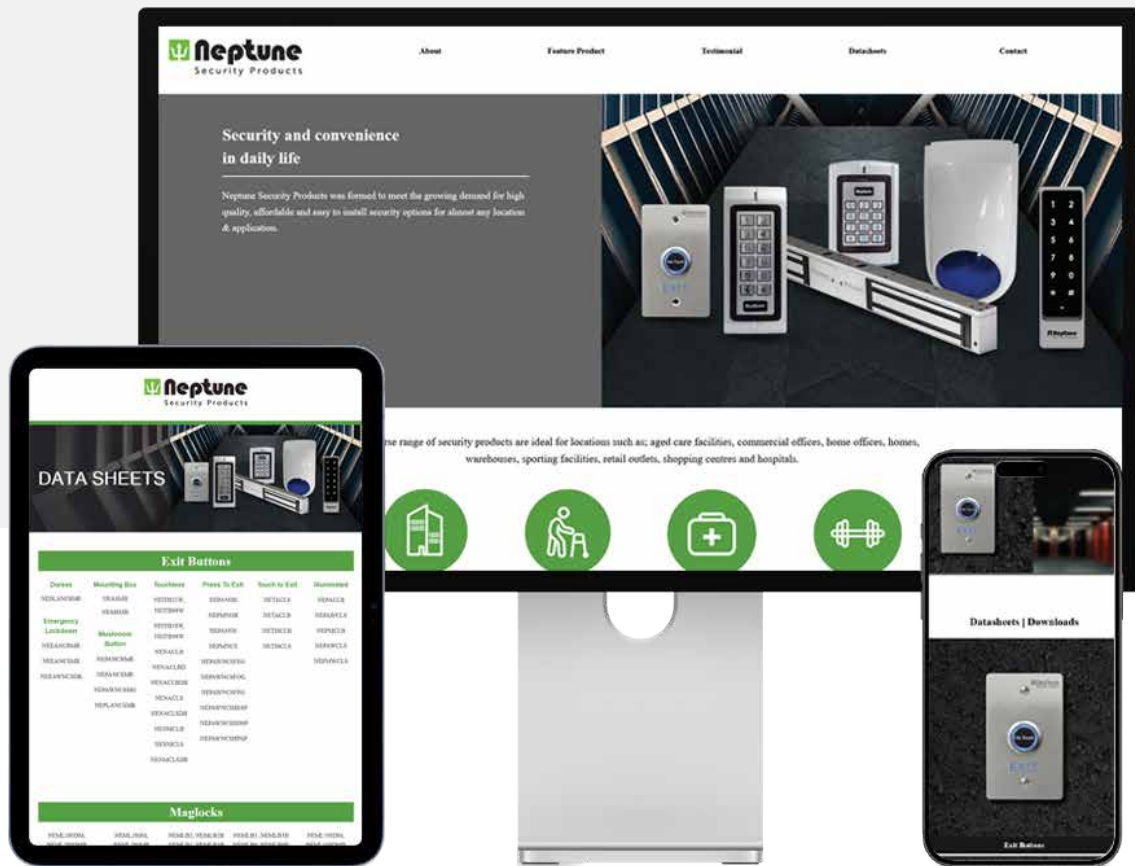

Features

- Reliable connectivity across multiple networks
- Secure & scalable for business-critical operations
- Flexible data plans for low, medium, or high usage
- Optimised for IoT devices and industrial systems
- Durable design for varied environments & applications
