SECURE6 BARRELS

All Secure6 barrels are Australian Made using the highest quality brass construction and state of the art CNC machinery.

Secure6 now offers the ability for multi profile keyways. A profile released in 2014 and now B profile released in 2019, both controlled by the M profile key.

All barrels are 12.6mm in diameter and will fit into your industry standard cylinder housings.

Keyway specifically designed to provide maximum protection against picking.

Wide variety of barrels to suit the Australian and New Zealand market.

Secure 6 can be keyed in the following ways:

Red	Pink
Grey	White
Green	Pearl White

“

Secure6 has been my “go to” in-line restricted profile of choice for the last 5 years. Some of my larger systems are below and have given me no trouble at all over the years. The complete range of cylinders including Gainsborough Trilock gives me the confidence to know that I can complete all restricted jobs with little fuss.

I have now moved onto the B broach to allow me the ability to multi broach some of these larger systems. From my point of view, I would endorse this system for its value, ease of use, stock holdings and quick delivery from LSC.

LARGE SYSTEMS ON SECURE6

Macarthur Girls High School	Parramatta	300 cylinders	180 keys
Lateral Estate - 2 Sites	Woli Creek and Liverpool	380 cylinder	700 keys
Hurststone High School	Glenfield	230 cylinders	4000 keys
