

# WiComm Pro

## Installers' Smart Choice

Superior Performance | Sleek design | Easy to Install

WiComm Pro is RISCO Group's next generation wireless alarm system, offering a high-end professional, Grade 2 system, in a new sleek, contemporary design and at a highly competitive price. With RISCO's extensive line of wireless accessories and cloud-based products and services, WiComm Pro is definitely the smart choice for professional installers.

### Superior Performance

Enhanced RF range and 2-way repeater for better performance.

### Fast Installation

Smart mechanical design allowing quick panel configuration, assembly and installation.

### Compact Sleek Design

Contemporary yet subtle design that fits any décor.

# Outstanding Performance. Sleek Design.

WiComm Pro, RISCO's new wireless alarm system, provides installers and end users with a superior user experience, featuring a contemporary yet subtle design and most importantly – professional, reliable and field proven security.

## Smart modular design

WiComm Pro benefits from a smart mechanical design which means configuring the panel, adding the communications module and mounting it on the wall has never been easier, meaning you can spend less time on site.

## Discreet and stylish wireless detectors

The wireless PIR Piccolo detector and the Slim Door/Window contact benefit from an innovative and clean design ideal for end users looking for a contemporary look and feel in their premises. The small and compact panel can fit to any location.

## Choice of communication modules

WiComm Pro benefits from a complete choice of communication modules, including 4G, Multi-Socket IP and Wi-Fi. This wireless professional security solution provides significant improved capabilities, with seamless and robust communication. At the same time, being multi-socket allows for simultaneous reporting to the Cloud and monitoring stations.

# RISCO Cloud - The Complete RISCO Ecosystem

With RISCO's vast array of products and solutions for the residential and commercial security markets, the RISCO Cloud creates an unmatched and complete ecosystem, designed with the installer in mind.

## Wireless Visual Verification

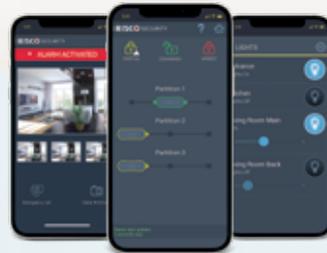

Indoor and outdoor integrated camera detectors deliver real time event verification. The eyeWAVE PIR Cam and Beyond DT Cam send immediate notification of triggered events directly to the Smartphone App, ensuring home and business owners are always in control.

## VUpoint Video Solution

Integration of the VUpoint IP camera and NVR solution with WiComm Pro will provide a superior and responsive system with video monitoring and live visual verification. VUpoint sends immediate notification (snapshots and 30 second video clip) of triggered events directly to smartphones, as well as live view of cameras and recording – all from one app.

VUpoint Desktop is RISCO's user-friendly Windows-based Video Management Software, allowing end users to monitor VUpoint video installations from their desktop or laptop computers

## Smartphone App

A single intuitive app enables full control of security, safety and smart home features, sending push notifications and images immediately to the smartphone, allowing homeowners to decide the best course of action within seconds. Initiating live video, controlling smart home devices, and managing all system detectors - all with a single click, on one interface.

## Cloud Installer Admin

RISCO Cloud is a robust revolutionary service and management platform for installation companies. It transforms an entire company into a cutting-edge, highly efficient, productive business operation, increasing profits, and driving business growth.

It is a one-stop-shop that delivers the ultimate toolbox helping RISCO installers define marketing strategy, establish and maintain a long-term customer base, while providing valuable insights into upsell opportunities, increasing recurring monthly revenue (RMR).

## Technical specifications

Wireless zones (1-Way or 2-Way)	32
Partitions	3
Wireless sounders (2-Way)	3 (indoor or outdoor)
Wired zones	4 (with I/O Expander)
Wired outputs	4 (with I/O Expander): 2x3A relay and 2x500mA
IP Camera (internal/external)	Unlimited number supported through the Cloud server
Wireless PIR Cameras (incl Beyond)	8
Keypads (2-Way)	Up to 3
Remote controls (1- Way or 2-Way)	8
X-10	Supported with I/O Expander
User codes	32
Event log	1000 (panel), 2000 (cloud)
Monitoring Station accounts	3
Follow-me destinations	16 (panel), unlimited (cloud)
Communication	Wi-Fi, 4G, 3G, 2G, IP, IP Multi-Socket
Reporting formats	Contact ID, SIA level 2 & 3 (text support), IP/GSM Receiver, SIA IP (with encryption)
Installer programming	Local using the keypad
Methods	Local using RS232 for Configuration Software Remote using Configuration Software (4G, IP) direct or through the cloud
Firmware upgrade	Local via RS232 or remote via 4G or IP
Automated scheduling	8 (arm/disarm or output control)
End user features	<ul style="list-style-type: none"> <li>• Smartphone app and web browser for video verification, arm/disarm, control and monitoring the system</li> <li>• Email: Event and images notification</li> <li>• SMS: Event notification and remote control</li> <li>• Push notifications, live video stream with recording capabilities</li> </ul>
Dimensions (H x W x D)	197.5 x 152.5 x 52 mm (7.78 in x 6 in x 2.05 in)
Approvals	EN50131 Grade 2, Class II; EN50136
Power	230VAC, 50/60 Hz 0.6A max.
Operating temperature	-10°C – 55°C (14°F to 131°F)
Weight (w/o battery)	0.77 kg
RF Immunity	According to EN 50130-4
