UNLOCK SMARTER WITH THE TOUT

Packed with the latest keyless and mobile technology, the SALTO Neoxx Electronic Padlock looks great while offering a unique solution to perimeter and field access control. Robust and durable, it features IP66 water resistance and dust protection for harsh environments and extreme climates.

The SALTO Neoxx is a padlock you can rely on for any type of application, and complements the most complete electronic locking platform on the market – from SALTO electronic locks and cylinders to online readers and locker locks.

Ideal for Utility Providers and Property Services

Securing access to power stations, telecommunications equipment and operational technology has never been so convenient. Whether it be a remote gate, or outdoor storage area, the SALTO Neoxx Padlock can handle any environment.

- **Ultimate Protection**

Made of hardened steel with a removable shackle model option, a special armoured case with double-layered structure guarantees protection from falls, shocks, and the harshest environment or usage.

- **Technology & Design**

Incorporating the latest BLUEnet Wireless real-time technology, the SALTO Neoxx padlock allows customers to connect to their on-premise network via SALTO's SVN technology or to the cloud with the SALTO KS cloud-hosted access management platform. Access rights of lost, stolen, or unreturned keys can be quickly and inexpensively removed from the system and/or digital keys can be issued immediately to the user's mobile out in the field.

- **Smart Key**

Easy-to-use and highly secure keyless technology provides instant and reliable access to any door. Combine the advantages of RFID (DESFire EV1 EV2, MIFARE, HID iCLASS Seos), BLE (Bluetooth Low Energy) and NFC technologies. End users can easily operate the padlock with their smart card or with their iPhones or Android phones, ending the hassles and expense of lost keys:

- Up-to-date access rights directly into the user's smartphone
- Dynamic user key management
- Automatic key renewal and cancellation
- User key instant cancellation
- Update the lock's denylist via a mobile phone

- **Long-Lasting Performance**

On just a standard set of batteries (4 x LR1), the SALTO Neoxx electronic padlock gives customers the power they need to maintain their installation. Low battery status capabilities monitor the electronic padlock battery levels to make more efficient access management, minimize lifecycle costs, and reduce maintenance costs.

UGH NEW SALTO NEOXX ELECTRONIC PADLOCK

TESTED AND APPROVED

Attack resistance: Mechatronic certification EN16864:2018.

IP66 certification: Waterproof performance and high durability.

Tested against extreme temperatures: Including freezing conditions (-35°C) and high heat (+65°C).

Tested up to 130,000 operations on a standard set of batteries (4 x LR1).

Certified according to CE, FCC, MIT, and IK09.

NEW

LED KEY GARAGES

Key Garages are almost always installed in poorly lit areas and mainly accessed at night. So instead of fumbling with torches or phones to dial the code use the new ABUS Key Garages with LED illuminate dials. Easy to read in low light conditions, better visibility and great for people with glasses.

Features:

- Slide the dust cover up and the LEDs light up 30 seconds
- Auto shut off
- 2 models available KG787LEDC (W/Mount) and KG797LEDC (P/Lock type)
- Battery life approx 2 years (depending on usage)
- Suitable for internal or sheltered covered area applications
- Battery replaceable with standard CR2032 coin cell
- Solid metal housing
- Locking cover made from zinc die-cast
- 4-digit individually resettable code
- Supplied display pack

NETWORKING YOUR SILCA FUTURA

GREAT NEWS...

YOUR SILCA FUTURA MACHINE CAN NOW BE CONNECTED TO YOUR NETWORK, SPEEDING UP SEARCHING TIMES AND SENDING INFORMATION FROM INSTACODE ALL FROM THE CONVENIENCE OF YOUR PC

You can now control your Silca Futura Machine from your PC.

For additional information on setting up Instacode, contact your Account Manager.

Note: this procedure will work on all Silca Futura Machines

- 1.** On the back of your Silca Futura Machine you will see an ethernet port, plug your ethernet cable into this port

- 2.** Open the Info tab on your Futura Software tablet

- 3.** You will see the IP Address, write this down

- 4.** Input the IP address into your Web Browser e.g. Google Chrome... **ITS THAT EASY!!!**

HAPPY CUSTOMERS

TALBOT SECURITY
